

Members of the House Education Committee (HEC):

I am asking that the committee pass HB2292 so control of course curriculum and education returns and remains the responsible of the our state.

Kansas needs to be the fifth state (Indiana, Oklahoma, South Carolina and Louisiana) to step up to its responsible and duty per state constitution.

Present program Common Core and pass act No Child Left Behind etc\*. push by the federal government should not inferior with the state's responsibility to ensure their citizens are sufficiently educated.

The federal government attempt to control education product ineffective and costly programs.

I have experience the damage that poor outside program can do with "Site Reading" when it was putted in the early 50s.

From a comment I have seen recently it may still being used? If it's being used in Kansas the State Board of Education needs to remove sick this program and not allow its use in Kansas funded schools.

Experimental programs/systems like this cause grievous damage to individuals and a great loss of potential to society.

The suffering it creates is criminal, especially when it does not have to be.

Education determents the good or evil that it will do to the civilize world, two examples:

"The philosophy of the classroom today will be the philosophy of the government tomorrow." - **Abraham Lincoln**

"Reason Hitler / Nazis took control of education in 1937".

Sincerely

Darrel Wilson
