Colorado-Kansas Division

About the Division

The Colorado-Kansas Division of Atmos Energy Corporation serves a diverse geographic region from the Western Slope of Colorado, across the Front Range, over the plains of western and central Kansas to the rolling hills on the state's eastern edge. Natural gas service in many communities was first provided by Greeley Gas Company. From its founding in 1944 by the Schlessman family, Greeley Gas grew by acquiring local gas distribution systems. Greeley Gas became part of Atmos Energy in 1993. Today, Atmos Energy proudly continues this division's long tradition of community service and excellent customer service.

President's Message

Natural gas offers Americans an affordable and efficient energy source that can help improve the environment and safeguard energy security. Atmos Energy is proud to deliver the benefits of this valuable and versatile fuel to our more than 3 million customers.

Our company's growth and success are intertwined with our product, along with our strong employee culture and our constant commitment to safety. In return, we actively contribute to the more than 1,400 communities we serve by participating in civic programs and providing financial and in-kind support for numerous charitable and educational organizations.

For more than 100 years, Atmos Energy has been committed to meeting our customers' energy needs, providing excellent customer service, upholding high standards for safety and reliability and giving back to the communities in which we live and work.

Gary W. Gregory, Colorado-Kansas Division President

Gary Gregory was named division president in 2012. Previously, Gregory had served for eight years as president of Atmos Energy's West Texas Division. With close to 30 years of experience in the energy industry, he also has been vice president of technical services in the Colorado-Kansas Division and has held engineering and operations positions at Atmos Energy and Entex. He holds a bachelor's degree in civil engineering from the University of Houston.
