

Re: HB2003

To Representative Houser and entire Kansas governing body:

My name is Audie Tash. I pastor the House of Prayer church in Riverton, Kansas. I live less than ½ mile from the proposed landfill site. I am committed totally to doing everything I can to stop this from moving forward. I hope all of the elected officials in Topeka would do all in their power from Governor Brownback all the way down to stop this gross misuse of a law passed to do good, but when used to its extreme, brings harm to many innocent people who trust their government to protect their life and liberties from a few greedy people who found a loop hole and by passed all of our county officials with no concern of other's rights.

I strongly urge all to vote unanimously for Rep. Houser's bill to pass so this type of underhanded use of a good law will never happen again. Our elected county commissioners should never be by-passed by any city government for the sole purpose of gain for that city at the expense of others 6 to 7 miles from the city limit of said city.

When our government looks the other way for a few and ignores the majority, something is wrong.

Please consider my words and reinforce my confidence in the government of the great state of Kansas.

Thank you

Audie Tash
