

STATE OWNED PROPERTY

EXCESSIVE ENERGY USE

ANNUAL REPORT

OCTOBER 20, 2015

*Attachment 8
JCSBC 10-20-15*

Legislation

This report is being provided per K.S.A. 75-37,128 which requires the Secretary of Administration to provide a written report on buildings that use an excessive amount of energy. Per this K.S.A. this report is intended for the following Legislative committees.

Joint committee on state building construction
House committee on energy and utilities
Senate committee on utilities

An electronic copy is to also be provided to the Legislature. The above referenced K.S.A. is shown below.

75-37,128. Rules and regulations concerning energy audits for state-owned real property and leased real property. (a) The secretary of administration shall adopt rules and regulations, within 18 months of the effective date of this act, for state agencies for the conduct of an energy audit at least every five years on all state-owned real property. On or before the first day of the 2010 regular session of the legislature and on or before the first day of each ensuing regular session of the legislature, the secretary of administration shall submit a written report to the joint committee on state building construction, the house committee on energy and utilities and the senate committee on utilities, or their successors, and an electronic copy to the legislature, identifying state-owned real property locations in which an excessive amount of energy is being used in accordance with rules and regulations adopted, within 18 months after the effective date of this act, by the secretary of administration concerning energy efficiency performance standards for state-owned real property.

Rules & Regulations

The information provided in this report is based upon information submitted by State Agencies as required by the rules and regulation adopted by the Department of Administration and filed with the Secretary of State on January 7, 2011. The following is a summary of the rules and regulations that deal with building audits and agencies identifying buildings that use and excessive amount of energy.

ARTICLE 66.—ENERGY AUDITS FOR REAL PROPERTY

1-66-1. Definitions. For purposes of this article, each of the following terms shall have the meaning specified in the regulation:

(a) "Agency Head" means an individual or body of individuals in which the ultimate legal authority of a state agency is vested by any provisions of law.

(b) "Division" means the division of facilities management within the Kansas department of administration.

(c) "Energy audit" means the utilization of a building energy-use benchmarking system, including the energy star portfolio manager, that generates a written report that details the conversion of a building's energy consumption data into energy-intensity metrics for the purpose of comparing the energy use of a building to the national average energy use of similar buildings.

(d) "Energy consumption data" means the monthly amount of energy consumed in the preceding 12-month period as recorded by utility distributing and selling energy or water services for a particular building.

(e) "Energy-intensity metrics" means the measurement of weather variations and changes in the physical and operating characteristics of each building.

(f) "Energy star portfolio manager" means an online energy management tool created by the United States environmental protection agency that uses an algorithmic formula for tracking and assessing energy and water consumption across a portfolio of buildings. The energy star portfolio manager can be accessed through the division's web site.

(g)(1) "Excessive amount of energy," when applied to a building subject to an energy audit, shall be determined by comparing the building's site and source energy-intensity metrics, annualized to a 12-month period, to the national average site and source energy-intensity metrics of similar buildings.

(2) If the site and source energy-intensity metrics of the building subject to an energy audit are greater than the national average site and source energy-intensity metrics, then the building shall be deemed to use an excessive amount of energy.

(h) "Secretary" means the secretary of the Kansas department of administration.

(i) "State agency" has the meaning specified in K.S.A. 75-3701, and amendments thereto. (Authorized by and implementing K.S.A. 2009 Supp. 75-37, 128; effective Feb. 4, 2011.)

1-66-2. Energy audit required for each state-owned building. (a) If a state agency owns real property, the agency head, or that person's designee, shall conduct and energy audit of each building on that real property and submit the written report to the division.

(b) An energy audit shall be conducted every five years for each building specified in subsection (a).

(c) If a state agency owns four buildings or less, the written reports for the first energy audits for all of the buildings shall be submitted no later than July 1, 2011.

(d) If a state agency owns five or more buildings, an energy audit for at least one-fifth of all those buildings shall be conducted each year. The written reports for the first energy audits shall be submitted no later than July 1, 2011.

(e) Each state agency conducting an energy audit shall indentify each state-owned building in which an excessive amount of energy is being used, pursuant to K.S.A. 75-37, 128 and amendments thereto. (Authorized by and implementing K.S.A. 2009 Supp. 75-37, 128; effective Feb. 4, 2011.)

Information Provided by State Agencies

To date, the Department of Administration has received **1008** audits from agencies that own buildings in the state. A total of **434** were submitted this year.

To make sure we had good participation, the Department of Administration sent written notifications to agency contacts on September 2nd 2015 (see attached). This notification detailed the requirement of the regulations noted above.

Buildings that Use & Excessive Amount of Energy

Of the **328** new building audits that were submitted this year, **120** of these audits indicated that the building used an excessive amount of energy. On the following pages is a list of these buildings. In support of this list is a copy of the audit that was submitted for each building.

tion agency has not produced an energy savings calculator for a specific energy star product, then the projected cost savings for the useful life of the energy star product shall be based on a comparison of the following:

(1) The initial cost of the energy star product plus the estimated lifetime operating cost of the energy star product; and

(2) the initial cost of a functionally equivalent product plus the estimated lifetime operating cost of the functionally equivalent product.

(d) This regulation shall apply only to the purchase of new, unused energy star products and equipment. (Authorized by and implementing K.S.A. 2009 Supp. 75-37,127; effective Feb. 4, 2011.)

Article 66.—ENERGY AUDITS FOR REAL PROPERTY

1-66-1. Definitions. For purposes of this article, each of the following terms shall have the meaning specified in this regulation:

(a) "Agency head" means an individual or body of individuals in which the ultimate legal authority of a state agency is vested by any provision of law.

(b) "Division" means the division of facilities management within the Kansas department of administration.

(c) "Energy audit" means the utilization of a building energy-use benchmarking system, including the energy star portfolio manager, that generates a written report that details the conversion of a building's energy consumption data into energy-intensity metrics for the purpose of comparing the energy use of a building to the national average energy use of similar buildings.

(d) "Energy consumption data" means the monthly amount of energy consumed in the preceding 12-month period as recorded by a utility distributing and selling energy or water services for a particular building.

(e) "Energy-intensity metrics" means the measurement of weather variations and changes in the physical and operating characteristics of each building.

(f) "Energy star portfolio manager" means an online energy management tool created by the United States environmental protection agency that uses an algorithmic formula for tracking and assessing energy and water consumption across a portfolio of buildings. The energy star portfolio

manager can be accessed through the division's web site.

(g)(1) "Excessive amount of energy," when applied to a building subject to an energy audit, shall be determined by comparing the building's site and source energy-intensity metrics, annualized to a 12-month period, to the national average site and source energy-intensity metrics of similar buildings.

(2) If the site and source energy-intensity metrics of the building subject to an energy audit are greater than the national average site and source energy-intensity metrics, then the building shall be deemed to use an excessive amount of energy.

(h) "Secretary" means the secretary of the Kansas department of administration.

(i) "State agency" has the meaning specified in K.S.A. 75-3701, and amendments thereto. (Authorized by and implementing K.S.A. 2009 Supp. 75-37,128; effective Feb. 4, 2011.)

1-66-2. Energy audit required for each state-owned building. (a) If a state agency owns real property, the agency head, or that person's designee, shall conduct an energy audit of each building on that real property and submit the written report to the division.

(b) An energy audit shall be conducted every five years for each building specified in subsection (a).

(c) If a state agency owns four buildings or less, the written reports for the first energy audits for all of the buildings shall be submitted no later than July 1, 2011.

(d) If a state agency owns five or more buildings, an energy audit for at least one-fifth of all of those buildings shall be conducted each year. The written reports for the first energy audits shall be submitted no later than July 1, 2011.

(e) Each state agency conducting an energy audit shall identify each state-owned building in which an excessive amount of energy is being used, pursuant to K.S.A. 75-37,128 and amendments thereto. (Authorized by and implementing K.S.A. 2009 Supp. 75-37,128; effective Feb. 4, 2011.)

1-66-3. Energy audit required for new lease, or lease renewal or extension, of non-state-owned real property. (a) Each new lease, or lease renewal or extension, for non-state-owned real property submitted by an agency head to the division for approval shall include the written report for an energy audit conducted by the

owner or lessor of each building on that real property that is the subject of the new lease, or lease renewal or extension.

(b) Subject to the provisions of K.S.A. 75-3739 and amendments thereto, a new lease, or lease renewal or extension, may be approved if either of the following conditions is met:

(1) The written report for the energy audit indicates that the leased space does not use an excessive amount of energy.

(2) The written report for the energy audit indicates that the leased space uses an excessive amount of energy, and the new lease, or lease renewal or extension, requires the owner or lessor to implement cost-effective energy conservation measures that are approved by the secretary to reduce or eliminate the excessive amount of energy. (Authorized by and implementing K.S.A. 2009 Supp. 75-37,128; effective Feb. 4, 2011.)

Article 67.—ENERGY EFFICIENCY PERFORMANCE STANDARDS FOR STATE-OWNED BUILDINGS

1-67-1. Definitions. For purposes of this article, each of the following terms shall have the meaning specified in this regulation:

(a) "Agency architect" has the meaning specified in K.S.A. 75-1254(a)(3), and amendments thereto.

(b) "Agency engineer" has the meaning specified in K.S.A. 75-1254(a)(3), and amendments thereto.

(c) "ASHRAE" has the meaning specified in K.S.A. 75-37,126, and amendments thereto.

(d) "Design development" means drawings and other documents that describe the size and character of a project's architectural, structural, mechanical, and electrical systems.

(e) "IECC" has the meaning specified in K.S.A. 75-37,126, and amendments thereto.

(f) "New construction" has the meaning specified in K.S.A. 75-37,126, and amendments thereto.

(g) "Project architect" has the meaning specified in K.S.A. 75-1251, and amendments thereto.

(h) "Project engineer" has the meaning specified in K.S.A. 75-1251, and amendments thereto. (Authorized by and implementing K.S.A. 2009 Supp. 75-37,129a; effective Feb. 4, 2011.)

1-67-2. Energy efficiency performance standards for new construction. (a) Subject to the provisions of K.S.A. 75-1250 through K.S.A.

75-1267 and K.S.A. 75-3784 and amendments thereto, each agency architect, agency engineer, project architect, or project engineer shall comply with ASHRAE or IECC at the time of submission of the design development for new construction.

(b) If an agency architect, agency engineer, project architect, or project engineer seeks to comply with a functionally equivalent standard other than ASHRAE or IECC at the time of submission of the design development for new construction, the agency architect, agency engineer, project architect, or project engineer shall submit a report verifying life-cycle cost-effective compliance for the new construction. The report shall be submitted to the department of administration, division of facilities management. (Authorized by and implementing K.S.A. 2009 Supp. 75-37,129a; effective Feb. 4, 2011.)

1-67-3. Energy efficiency performance standards for renovated, retrofitted, or repaired buildings. (a) Subject to the provisions of K.S.A. 75-1250 through K.S.A. 75-1267 and K.S.A. 75-3784 and amendments thereto, each agency architect, agency engineer, project architect, or project engineer shall, to the extent possible, comply with ASHRAE or IECC at the time of submission of the design development for the renovation, retrofit, or repair of each state-owned building.

(b) If an agency architect, agency engineer, project architect, or project engineer seeks to comply with a functionally equivalent standard other than ASHRAE or IECC at the time of submission of the design development for the renovation, retrofit, or repair of each state-owned building, the agency architect, agency engineer, project architect, or project engineer shall submit a report verifying life-cycle cost-effective compliance for the renovation, retrofit, or repair of each state-owned building. The report shall be submitted to the department of administration, division of facilities management. (Authorized by and implementing K.S.A. 2009 Supp. 75-37,129a; effective Feb. 4, 2011.)

Article 68.—AVERAGE FUEL ECONOMY STANDARDS FOR STATE-OWNED MOTOR VEHICLES

1-68-1. Definitions. For purposes of this article, each of the following terms shall have the meaning specified in this regulation:

(a) "Average fuel economy" shall have the

Kansas Agency Energy Audit Report Staff Member,

This email is to remind you of the Requirement for the Excessive Energy Report information due on July 1, 2015. I have attached the regulation for your convenience.

If you have not already submitted the report, I would ask that you compile the information and get it sent to me.

If you have sent the report, Thank You.
