

# Capital Improvements Program

**Fiscal Year 2017**

# FY 17 Project Selection Process

- Primary Focus: **Preserve Building Assets**
- Long-term Focus: **Preserve Infrastructure**
  - Buildings must work with modern equipment
  - Buildings need good access to the roadways

# Rehabilitation/Repair

29-3

- Total KDOT buildings
  - 966 buildings 2,864,046 sq ft
- People buildings – offices/labs
  - 206 buildings 1,306,521 sq ft
    - District, Areas, Subareas, Material Labs, Construction
- Support buildings
  - 760 buildings 1,557,525 sq ft
    - Chemical, equipment, materials storage
    - Vehicle wash buildings

# Rehabilitation/Repair

## Typical Rehabilitation/Repair expenditures:

- Door and Window Repair/Replacement
- Heating, AC Repair/Replacement
- Lighting and Electrical Repair/Replacement
- Interior & Exterior Painting
- Plumbing Repair/Replacement
- Roofing Repairs
- Overhead Door Repair/Replacement
- Salt/Sand Building Repair
- Fencing Repairs/Yard Security
- Parking Lot Repair/Resurfacing

# Example Rehab/Repairs

29-5  
5-6c

# Reroofs

- FY2017 Reroofs:
  - Seneca Salt Dome
  - Edwardsville Shop
  - Overland Park (167th St.) Subarea
  - Overland Park (167th St.) Salt Dome
  - St. Francis Salt Dome
  - Jetmore Salt Dome
  - Ulysses Area Crew Shop

29-6

# Reroofs

29-7

- Typical Salt Dome before reroof

- Typical Salt Dome after reroof

# Subarea Bay Modernization

- FY2017 Subarea Projects:
  - Smith Center
  - Alma
  - Ulysses

# Subarea Bay Modernization

29-9

- Wamego Before

Wamego After

- Belleville Before

Belleville After

# Relocate Concordia Subarea

29-10

- Functionally Obsolete Facility:
  - Building too small for modern Equipment
  - Yard too small for Equipment/Storage
  - No expansion space
  - Poor truck access

The Concordia Subarea is a 1940s building, located on 1.5 acres of land split in half by a city street right-of-way

Access – Poor for exiting trucks

Room for Modernization – No  
Yard Size – 1.5 acres,  
divided

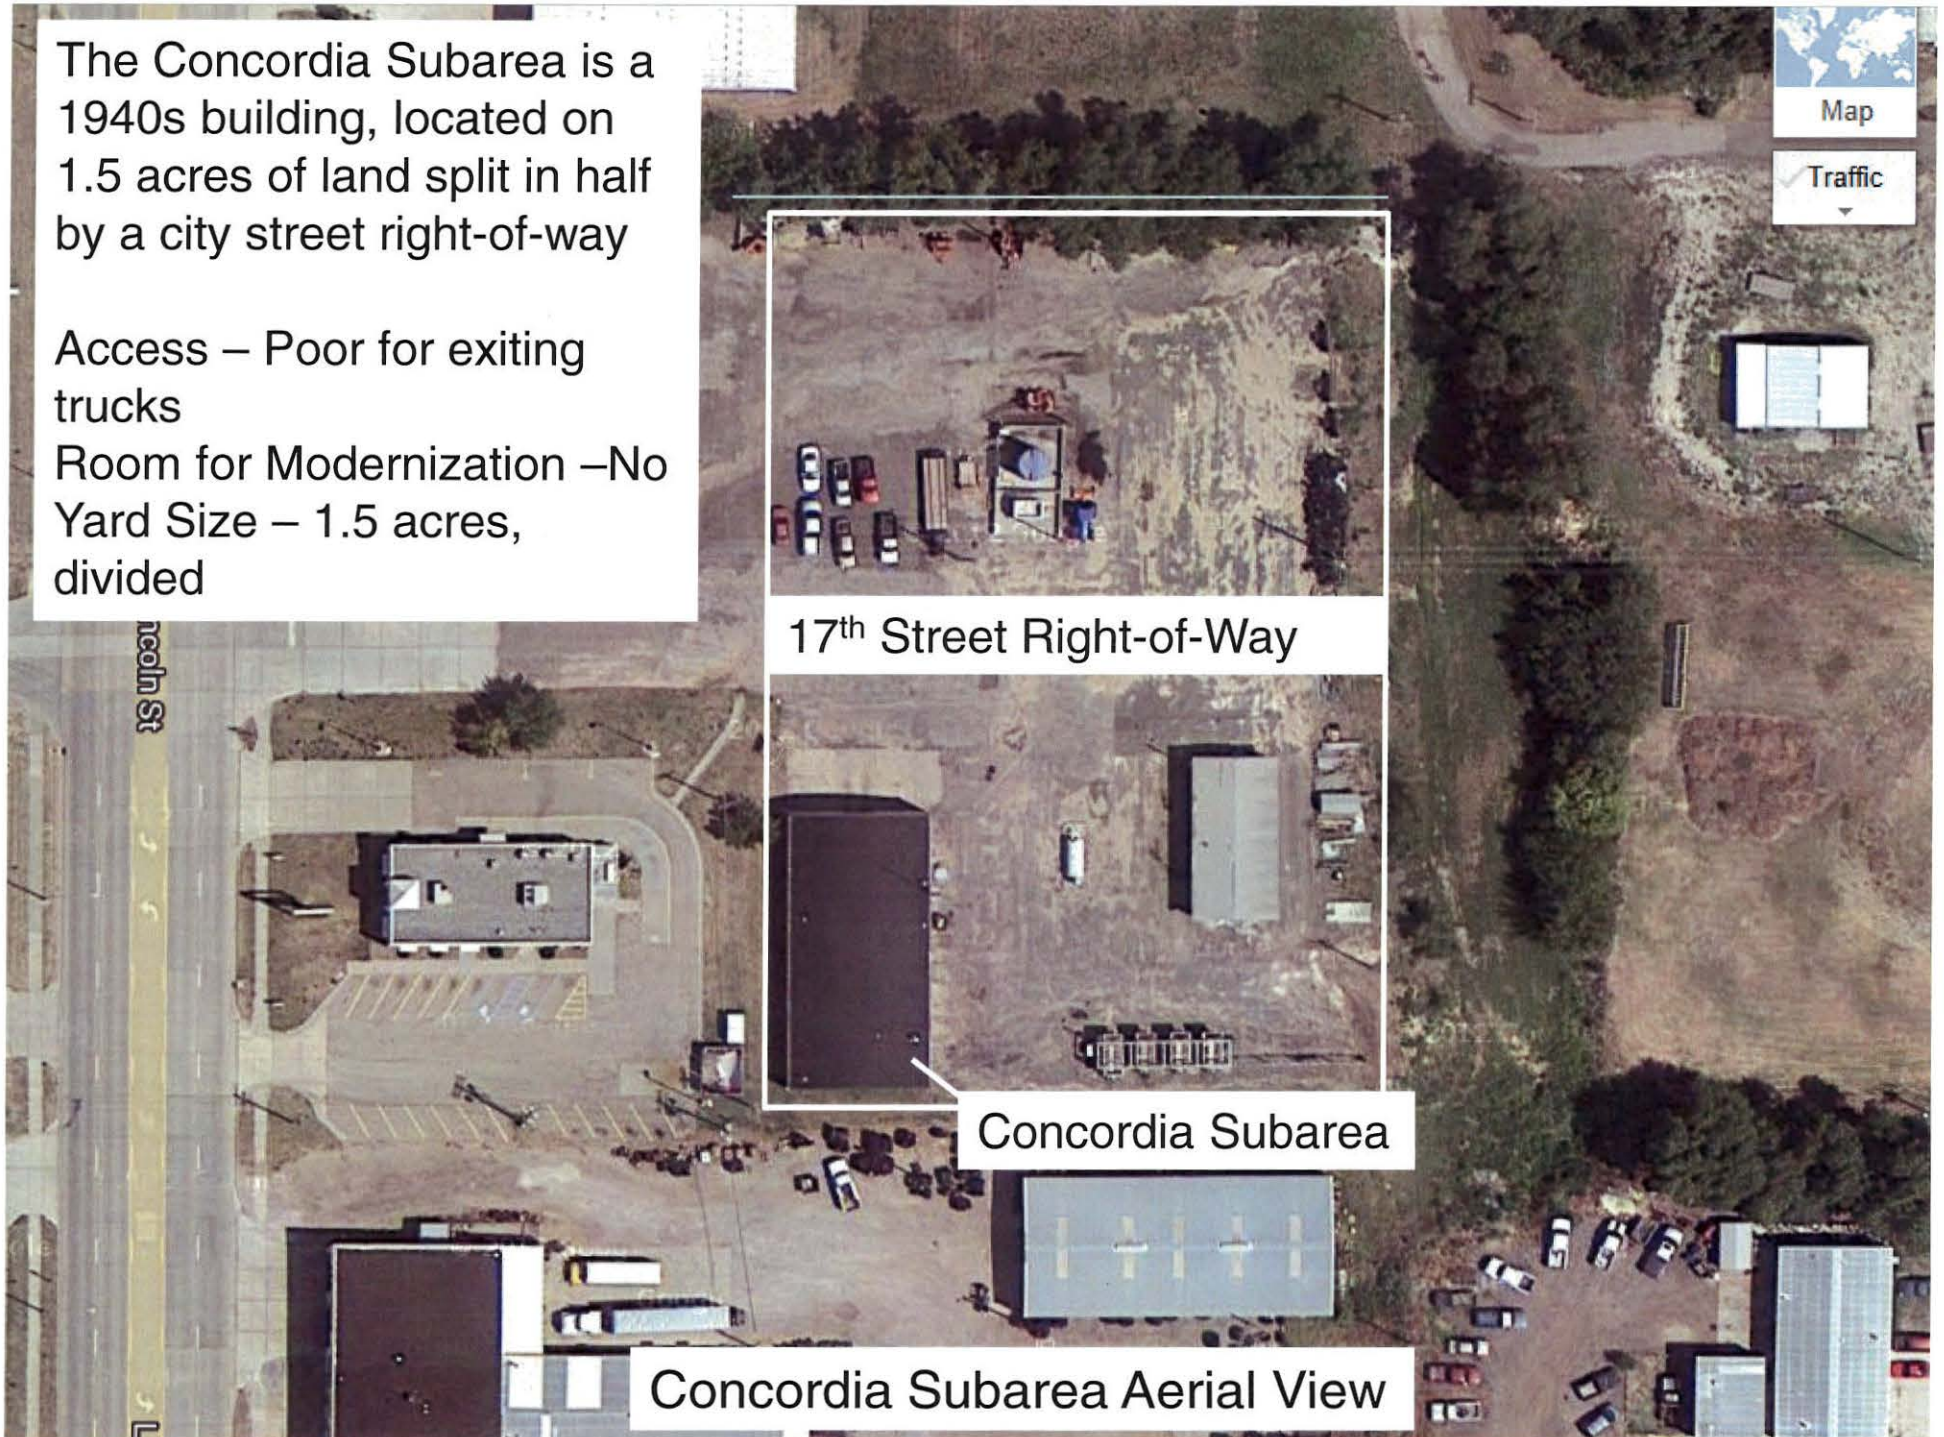

17<sup>th</sup> Street Right-of-Way

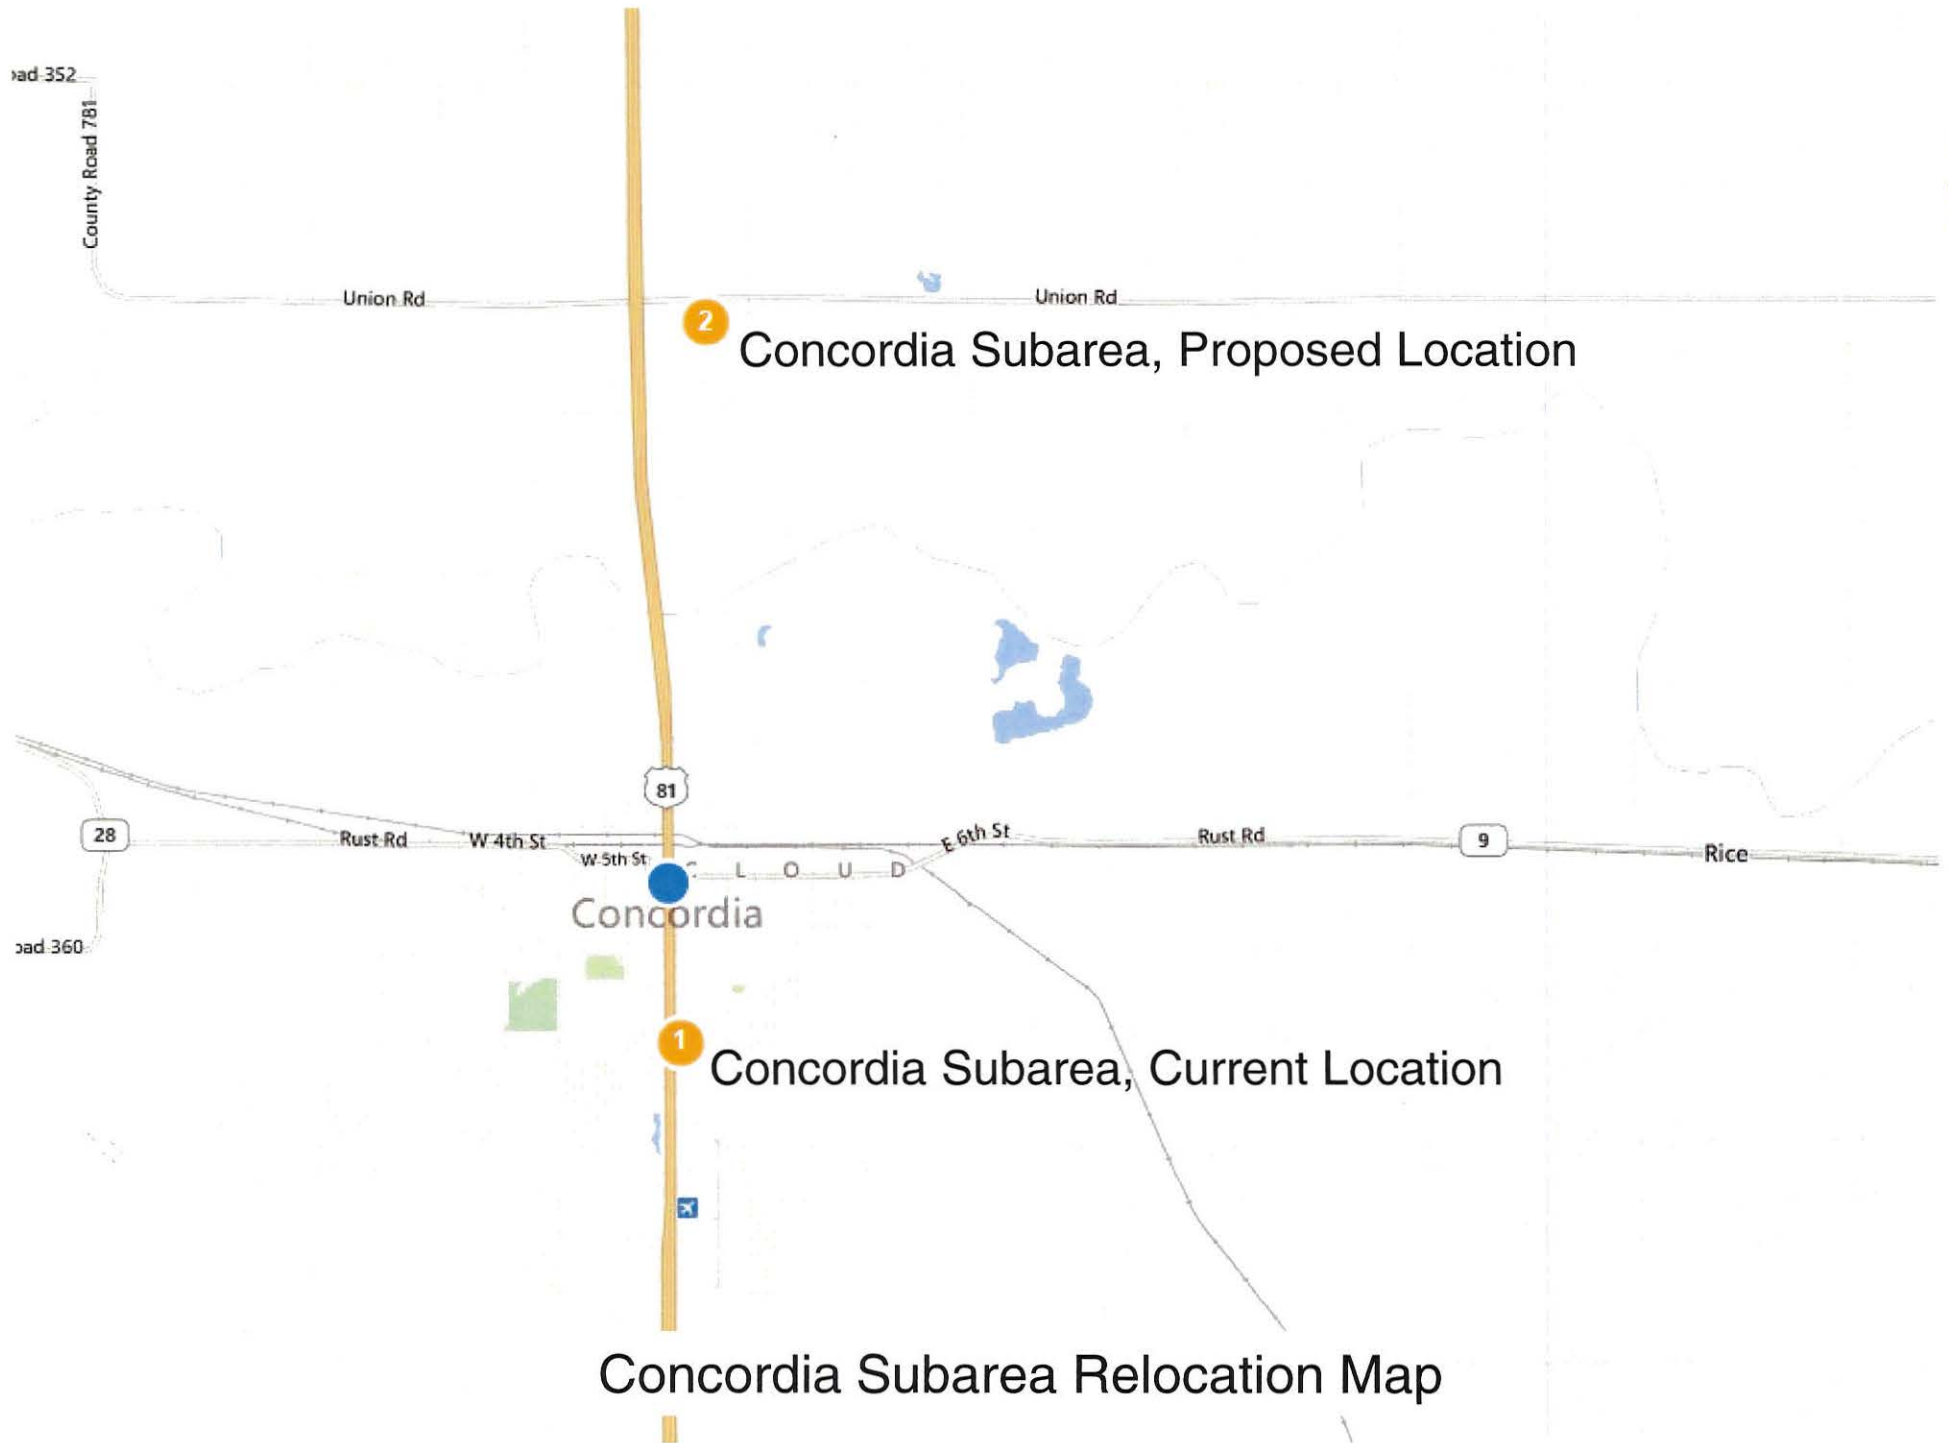

Concordia Subarea

Concordia Subarea Aerial View

29-11

# Estimates for Concordia Subarea

29-13

• Office Space	\$ 300,000.00
• Truck Bays w/ Wash Bays	\$ 910,000.00
• Salt Storage	\$ 250,000.00
• Equipment Storage	\$ 60,000.00
• Architect/OFPM/Fees	\$ 145,200.00
• Misc. (Fence, Pave, Fuel etc.)	<u>\$ 321,000.00</u>
	\$ 1,986,200.00

1. Project Title: Rehabilitation and Repair		2. Project Priority: 1																																																																
<p>3. Project Description and Justification:</p> <p>This continuing program is essential to the preservation, upkeep, and restoration of KDOT buildings as they continue to age. It is intended to provide safe, energy efficient, serviceable, and functional facilities to support the mission of the agency and maximize protection of the original investment at a minimal cost.</p> <p>Individual locations and repair specifics vary from year to year depending on "wear and tear" and natural events. Any improvement projects or space alteration is based on a building/site condition analysis and an assessment impact on operating functions. Expenditures target repairs and equipment replacements for improved energy efficiency, emergency repairs, and other unanticipated utility-related occurrences at the building. In addition, this program includes repairs to the non-structural improvements to the land (i.e. sidewalks, parking lots, etc.)</p> <p>KDOT is responsible for the maintenance of approximately 970 buildings with a total square footage of more than 2.8 million square feet. The buildings include 205 primary buildings which are KDOT and KHP offices, shops, and labs, which house personnel. The other 765 structures include chemical storage buildings, equipment storage, material storage, wash buildings, etc., which support KDOT functions.</p>

DA-418B

1. Project Title: Reroof Buildings - Various Locations		2. Project Priority: 2																					
<p>3. Project Description and Justification:</p> <p>This is a continuing program to replace deteriorating roofs on selected KDOT buildings. The requested projects represent priority needs based on on-site inspections. Complete reroofing is required when conditions are such that maintenance and repair treatments are no longer practical or feasible.</p> <p>The determination to reroof completely, as opposed to a maintenance or repair action, is based upon several factors:</p> <ul style="list-style-type: none"> <li>a. Age of roof</li> <li>b. Current condition of the roof</li> <li>c. Storm damage (hail, strong wind, etc.)</li> <li>d. Previous maintenance</li> <li>e. Economics of repair versus replacement</li> <li>f. Effects of leaks on building contents or usage</li> </ul> <p>It is requested that plans and specifications for the roof replacement projects be prepared, contracts administered, and project inspection be done by the Division of Facilities Management.</p> <p># Includes fees (\$466,199) for Division of Facilities Management. (See Attached Sheet)</p>																							
<p>4. Estimated Project Cost</p> <table style="width: 100%;"> <tr> <td>1.) Construction, including fixed equipment and sitework</td> <td style="text-align: right;">2,960,003</td> </tr> <tr> <td>2.) 1. Project Title: Subarea Bay Modernization - Various Locations		2. Project Priority: 3																					
<p>3. Project Description and Justification:</p> <p>This project continues a multi-year program to address the equipment bays of the KDOT subareas. Currently, the bays are not of sufficient depth to house our dump trucks when they are equipped with a salt/sand spreader and a snow plow. This requires the dump trucks to be parked outside, not loaded with salt/sand material, and/or the snow plows to be unattached prior to a snow/ice event. Delayed response time is experienced due to cleaning the windshield of the snow/ice covered truck, loading it with salt/sand material, and attaching the snow plows before deployment to the highways. This extra time could be eliminated if the dump truck could be parked inside an adequately sized bay so it was loaded and equipped before the storm.</p> <p>KDOT subarea facilities were constructed in the late 1950s and early 1960s. The current projections for these buildings are to use them for many more years. The subarea modernization program request addresses the equipment bay portion of these facilities. The agency will address subarea office needs through the use of our rehabilitation and repair funds.</p> <p>It is requested that plans and specifications for this project be prepared and the contract administered by the Division of Facilities Management.</p> <p># Includes fees (\$2,312,941) for Division of Facilities Management. (See Attached Sheet)</p>

## Kansas Department of Transportation Program Statement

The subarea work unit is the most important unit in KDOT. Over the years due to changes in policies, technology, and equipment, the number of facilities and employees within each work unit has declined, thereby requiring each work unit to do more work with fewer resources.

With these reductions, in order for KDOT to continue to meet the agency mission it has had to change and improve its highway maintenance operations. This more efficient and effective maintenance operation has been achieved through new technology and procedures, and more sophisticated, expensive, and larger equipment.

Currently, the bays are not of sufficient depth to house our dump trucks when they are equipped with a salt/sand spreader and a snow plow. This requires the dump trucks to be parked outside and/or the snow plows to be unattached prior to a snow/ice event. Delayed response time is experienced due to the extra effort of cleaning the snow/ice covered truck and loading it with salt/sand material before deployment to the highways. This extra time could be eliminated if the dump truck could be parked inside an adequately sized bay so it was loaded and equipped before the storm.

KDOT subarea facilities were constructed in the late 1950s and early 1960s. The current projections for these buildings are to use them for many more years. The agency has re-evaluated the previously submitted subarea modernization program request and has reduced the program to only address the equipment bay portion of the facility. The agency will address subarea office needs through the use of the rehabilitation and repair funds.

The subarea extension program will consist of four subareas each year in order to meet current and future functionality. Additionally, the bay extensions will allow continuation of effective use of the existing facility for many more years into the future.

It is anticipated the enlarged subarea bays will improve efficiency and effectiveness of the subarea crew and equipment and provide a quicker response to the highways during a snow/ice event.

1. Project Title: Relocate Subarea/Area Crew - Concordia		2. Project Priority: 4																					
<p>3. Project Description and Justification:</p> <p>This project would provide for the construction of a building that will house the Concordia subarea crew and the Area crew, equipment storage, a wash bay building, a chemical storage dome, and a salt/sand bunker. The land for the new facility has been purchased.</p> <p>The present subarea facility is located in a commercial area behind Kentucky Fried Chicken and an auto parts store in Concordia. The existing subarea site is approximately 1.5 acres split by 17th Street right-of-way. The subarea uses 17th street right-of-way and two lots (264' x 132' and 220' x 142'). The present site does not have the yard space to allow for adequate storage of materials or equipment. Access to US-81 expressway in Concordia is provided by an unsignalized intersection using 17th Street. Recent improvements and additional lanes on US-81 along with increased traffic make ingress and egress a difficult and potentially dangerous situation.</p> <p>The new facility for the subarea will be shared by the area crew. Future plans call for the area office to be moved to this same location. Therefore the new subarea facility must be large enough to house the additional crew.</p> <p>* Includes fencing, hot mix entrances, drives, and parking area.</p> <p>An associate architect will be required for this project.</p> <p># Includes fees (\$8,533) for Division of Facilities Management and (\$317,765) for equipment, chemical storage, and a vehicle wash bay.</p> <p>(See Attached Sheet)</p>

## Kansas Department of Transportation Program Statement

Current Facility:

The present facility is a concrete block building, built in the 1940's and purchased from a contractor in the 1960's. It is located behind commercial strip development along US-81 in the city of Concordia on 1.5 acres of land, which is split by 17th Street right-of-way. The size of the yard restricts all maintenance activities and materials storage ability. Due to surrounding commercial development, purchase of adjacent property is financially unreasonable.

Access to US-81 expressway in Concordia is provided by unsignalized 17th Street. Recent improvements and additional lanes on US-81 along with increased traffic makes ingress and egress a difficult and potentially dangerous situation for the subarea.

The subarea is the basic unit of highway maintenance. It is responsible for the physical maintenance of all state highway roadsides, roadways, structures, and associated facilities located within its boundaries as follows:

Maintains Approximately:

240 lane miles of roadway  
51 bridges  
1,732 acres of right-of-way  
2,056 signs  
35,000 feet of guardrail

Present staffing plans:

1 - Subarea Supervisor  
1 - Equipment Operator III  
9 - Equipment Operator II's

Future staffing plan to include the Area Crew:

1 - Supervisor  
4 - Equipment Operators

Proposed Facility:

A new subarea shop that will house a subarea crew and an area crew is proposed to be constructed on approximately 20 acres of ground north of Concordia on the south side of Union Road approximately 1/2 mile east of US-81. The building will have approximately 6,400 square feet of space. The space will be divided into 1,500 square feet of insulated, weatherproofed, heated and cooled office and storage area. The office shall include: 2 supervisor offices, a crew/safety meeting room, male and female restrooms, and storage area. The building will be used as the headquarters for the subarea crew and the area crew.

Uses for the building include: material and parts storage and a garage for subarea crew and area crew trucks. The bays are sized to house tandem axle dump trucks equipped with snow plows and material spreaders. The configuration of the building will generally be left to the architect to decide based on the site parameters and budget limitations, but the equipment bays shall be drive through bays.

The project will include the construction of ancillary structures necessary for a combination of subarea-area crew facility. This includes two separate 8 bay equipment storage buildings, a chemical storage dome, and a salt/sand bunker.

Location:

The new location will be a 20 acre plot north of Concordia along Union Road approximately 1/2 mile east of US 81. This land has been purchased and is currently having utilities (water and sewer) run to its location.

It is anticipated the new facility will affect our operating budget with a reduction of utility bills due to improved energy conservation and improved efficiency of the subarea crew, equipment, and response time.

DA-418B

1. Project Title: Remote Chemical Storage Bunkers		2. Project Priority: 5																					
<p>3. Project Description and Justification:</p> <p>This project is to build remote chemical storage bunkers at locations not identified or addressed during an earlier program. This project will provide materials only and KDOT maintenance forces will construct the structures. The structures will be three-sided bunkers constructed with concrete interlock blocks, wood planking, or concrete precast panels and topped with an arched frame tarp system. This structure will provide capacity for 200 tons, 300 tons, or 400 tons of salt/sand material and will include accommodations for an equipment loader. These structures will be located to supplement our winter operations.</p> <p>Often during a winter storm event, trucks are loaded with materials at their respective subareas. After distribution of the truckload of salt/sand material, it is necessary to deadhead (travel without a load of material) to the subarea shop to reload. With remotely located chemical storage facilities, the deadhead time and mileage can be eliminated. This improves the response time and efficiency of KDOT during a winter event. This results in savings of time, mileage, fuel, and money. Depending upon the exact location, the sites are used as a reloading facility for two to four different subareas and improve their response and efficiency.</p> <p>(See Attached Sheet)</p>																							
<p>4. Estimated Project Cost</p> <table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 80%;">1.) 1. Project Title: Relocate Subarea - Newton		2. Project Priority: 8																					
3. Project Description and Justification: This project would provide for the construction of a six-stall subarea shop, equipment storage, and chemical storage to replace current facilities. The current facility is located in a residential neighborhood in Newton on 1.4 acres, with poor access to the highways maintained. The small size of the yard restricts the amount of materials that can be stored.  An associate architect will be required for this project. * Includes fencing, hot mix entrances, drives, and parking areas. # Includes fees (\$11,130) for Division of Facilities Management and (\$328,061) equipment and chemical storage.  (See Attached Sheet)

## Kansas Department of Transportation Program Statement

Current Facility:

The present facility is a concrete block building, built in 1961. It has a six-bay garage with a subarea office and a KHP office. The present facility is located in the city of Newton on approximately 1.4 acres. The size of the yard restricts all maintenance activities and the amount of materials storage on site. The subarea is located in a residential neighborhood with poor access to the highways maintained.

The subarea is the basic unit of highway maintenance responsible for the physical maintenance of all state highway roadsides, roadways, structures, and associated facilities located within its boundaries as follows:

Maintains approximately:

197 lane miles of roadway  
134 miles of paved shoulder  
70 bridges  
183 culverts  
852 acres of right-of-way

Present staffing plans:

1 - Subarea Supervisor  
1 - Equipment Operator Specialist  
7 - Equipment Operators

Proposed Facility:

A new subarea shop/office is proposed to be constructed on land near I-135 and US-50 highways purchased in FY 2009. This location will allow good access to the routes covered by this subarea and will provide sufficient land for the subarea facility with adequate room for material storage and a mixing strip.

The building will have approximately 7,000 square feet of space. The space will be subdivided into 2,110 square feet of insulated, weatherproofed, air conditioned office, storage area, KHP office, and six 50' x 16' 4" equipment bays. At least two of the bays will be heated and one will be designed as an equipment wash bay. The building will be used as the headquarters for the subarea crew. The building will also include material storage, parts storage, and garage space for subarea trucks. The bays are sized to house dump trucks equipped with snow plows and material spreaders. The type of building and configuration will generally be left to the project architect to decide based on the site, neighboring structures, and budget limitations.

The project will include the construction of ancillary structures necessary for a subarea facility. This includes a 10 bay equipment storage building, a chemical storage dome, and a salt/sand bunker.

It is anticipated the new facility will affect our operating budget with a reduction of utility bills due to improved energy conservation and improved efficiency of the subarea crew, equipment, and response time by operating out of a single location.

## Kansas Department of Transportation Program Statement

Current Facility:

The existing Area Two Office and Shop Complex at East Highway US-36, Mankato, Kansas, is dependent on local business to support KDOT's operations. Mankato is experiencing a decline in businesses that provide needed support. The 1954 Area Two brick building is functionally obsolete. The office space is inadequate to accommodate business equipment and staff. The continuing decline in the availability of parts, supplies, and services along with the facility obsolescence has reduced the effective use of the location.

The existing Area Two Construction office is located with the subarea shop North on US-81 at Belleville. The 1963 concrete block building does not provide the space to adequately accommodate equipment and staff. The separation of the Area and Construction offices presently complicates the coordination of construction and maintenance activities along with the management of construction administration. Relocating these facilities to Concordia will consolidate our operations resulting in improved effectiveness.

Location:

It is proposed to construct the Area complex on land purchased for the Concordia Subarea.

Area-General:

The basic Area building was constructed in 1954 and has undergone several modifications. The construction office was constructed in 1963 and has undergone several modifications. Both the area building and the construction office do not provide adequate space to accommodate equipment and staff.

The decline of support businesses for the area office along with the independent locations and the functional obsolescence of both the area and construction offices restrict operational efficiency.

The Area Two Complex is the hub of KDOT maintenance operations for most of Cloud, Jewell, Mitchell, and Republic counties. An Area Construction office will also be located in the Area office building.

Proposed Area Facilities:

The proposed KDOT area office and shop building will be approximately 14,900 square feet. The shop area should include 5,500 square feet area with five stall shop and mechanic office. The Area office and stockroom should include 4,700 square feet with an Area Engineer office (200 square feet) and an Area Maintenance Superintendent office (180 square feet). The Construction office area should include 4,700 square feet with the Construction Engineer's office (180 square feet), Conference room (250 square feet), Lab (200 square feet), Equipment Storage (100 square feet), Storage Area (200 square feet), and Office Area. An access roadway; employee and visitor parking; and storage areas for vehicles, equipment, and materials will be required along with fencing to develop the site. 11 maintenance and 13 construction employees would be located at the facility.

DA-418B

1. Project Title: Construct District One Headquarters - Topeka		2. Project Priority: 10																					
<p>3. Project Description and Justification:</p> <p>This project would relocate and consolidate to a single site the following facilities:</p> <p>a) District One Headquarters Office and Maintenance Shop (1-0001)</p> <p>b) District One Materials Lab (1-0007)</p> <p>c) District One Supply and Stockroom (1-0010)</p> <p>It is proposed the complex would be built on existing KDOT property near the I-70 interchange at 21st and Rice Road in east Topeka. The proposed facility would include a new District One Headquarters complex comprised of multiple new buildings and would be constructed in several phases over three years. This project would relocate the current District One complex. The current District One Office/Shop was originally constructed in 1934. Additions were made in 1958, 1961, and 1985. The District One Materials Lab was constructed in 1936.</p> <p>In 2007 an architectural firm completed a feasibility study of the District One Headquarters complex. The study considered the agency's options to stay at the current site or to relocate and construct a new facility. Upon review of the study, KDOT determined the greatest long term benefits would be to relocate the complex. A new facility would improve the operational efficiency and long term costs for the District One Headquarters.</p> <p>An associate architect will be requested for this project.</p> <p># Includes fees (\$168,989) for Division of Facilities Management.</p> <p>* Includes fencing, drives, parking, and utilities.</p> <p>(See Attached Sheet)</p>

Kansas Department of Transportation Program Statement

General:

The District One Office/Shop is one of six transportation districts statewide and is responsible for the administration, construction, maintenance, and materials in constructing and maintaining the state highways in the northeastern 17 counties of the State of Kansas. This includes both the Kansas City and Topeka metropolitan areas. Of all of the KDOT District's, District One is responsible for the most staff and greatest number of highway miles.

Current Facility:

The current District One Office/Shop located in central Topeka was originally constructed in 1934. Additions were made in 1958, 1961, and 1985. Several projects have occurred over the years to maintain the facility (re-roofs, repairs, etc.) However, there are many original core systems to the building which are antiquated including plumbing, HVAC, and electrical, which are in need of extensive replacement and upgrade.

The current District One Materials Lab was constructed in 1936 and is located near the District One Headquarters. The lab is the last of the six districts not to be either replaced or renovated. The facility is very small and does not provide sufficient room to house the testing equipment to efficiently meet the current highway materials testing practices. The District One Supply and Stockroom is located one-half mile away from the District One Headquarters.

The District One Office conference room is the location where the necessary training and meetings are conducted for the support of the District personnel and business. The District One Shop is the location for the District's centralized equipment support and repair. The current location requires the transport of large equipment through highly congested streets to the center of Topeka. The site is small and limited and does not provide sufficient parking nor efficient equipment movement or storage area.

In 2005, an architect was hired to conduct a feasibility study to assess the current facility and assist the agency in determining whether to keep the District One Headquarters at the current site or to relocate the complex. The results of the study were received in 2007, and upon review of the study, KDOT determined the greatest long term benefits would be to relocate the complex.

## Program Statement (continued)

Proposed Facility:

This project would relocate and consolidate to a single site the following facilities:

- a) District One Headquarters Office and Maintenance Shop (1-0001)
- b) District One Materials Lab (1-0007)
- c) District One Supply and Stockroom (1-0010)

It is proposed the complex would be built on existing KDOT property near the I-70 interchange at 21st and Rice Road in east Topeka.

The proposed facility would include a new District One Headquarters complex comprised of multiple new buildings and can be constructed in several phases. The proposed Maintenance shop would be approximately 32,000 square feet and include equipment repair bays for both light and heavy duty equipment, a welding shop, paint prep and paint booth, and wash bay. Space will also provide equipment supply storage, employee break room, rest rooms, and shop supervisor office.

The proposed Administration office and conference building could be designed and constructed either to be attached to the Maintenance shop or could be a standalone building. The Office would be approximately 14,000 square feet and include office space for district staff, conference/meeting room, employee break room, rest rooms, and file storage.

The proposed Supply/Stockroom and the proposed District Materials Lab would each be stand-alone buildings. The Supply/Stockroom and storage building would be approximately 7,500 square feet. This building would include office space for stockroom staff and a loading dock. The District Materials Lab would be approximately 6,800 square feet and include office space, storage space, an aggregate and compaction room, an area for laboratory testing equipment, asphalt extraction room, a sample breakdown area, nuclear meter storage area, and a garage. The proposed structure would accommodate existing testing equipment and equipment for new testing procedures related to the use of highway materials quality control/quality assurance specification requirements.

It is anticipated the new District complex would improve efficiency of staff, equipment, and functionality for district headquarter personnel in addition to personnel from throughout the district when they use district services, equipment, or supplies. The new facility would provide an operational energy efficient building design. The new location would provide increased space for improved and efficient operations at a single site near the highways of KDOT's responsibility.

DA-418B

1. Project Title: Update Electrical & Bay Extension District Two Shop - Salina		2. Project Priority: 11																					
<p>3. Project Description and Justification:</p> <p>This project is to consolidate the electrical systems from five different electrical panels located in different portions of the District Two Shop building. This project will also update the main service panel to an 800 amp 3 Phase 208 volt service. This will replace the existing 400 amp service panel that does not meet current code requirements or needs. New wiring is required throughout the building.</p> <p>The main shop area is currently 40 ft. in depth. The depth of the shop does not allow some current equipment to fit in the shop and creates safety concerns when working on large pieces of equipment. The physical size of the shop and current equipment create safety concerns due to the tight quarters and force some work to be done outside.</p> <p>This project will also extend the existing bays 30' to the rear of the building with a 30'x120' addition. The addition portion of the end bay will have a 14 ft. x 16 ft. overhead door to make it a single "drive through" bay. A 3 ton, 100 ft. long overhead single rail crane running across the addition will provide for lifting needs in the extended shop area. The addition will be comprised of brick to match the existing exterior.</p> <p>An associate architect will be required for this project.</p> <p># Includes fees (\$8,423) for Division of Facilities Management.</p>																							
<p>4. Estimated Project Cost</p> <table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 60%;">1.) ## Kansas Department of Transportation Program Statement

Current Facility:

The present facility is a concrete block building located at 910 Capital St., Kinsley, Kansas. This building was built in 1961 as a 6 bay subarea and KHP office. This site is currently serving as a Sub Area office and shop with a KHP office. The site has 2.3 acres and does not have adequate space for the current size of the subarea. The yard is very small and is difficult to navigate and load or unload equipment. This facility is approximately 1 block away from US-56 and 0.25 mile from US-50 so accessibility to the state Highway system is good, but the property has City streets or easements on three sides and the US-50 bridge fill slopes on the south, so no expansion of the current property is possible.

The subarea is the basic unit of highway maintenance responsible for the physical maintenance of all state highway roadsides, roadways, structures, and associated facilities located within its boundaries as follows:

Maintains approximately:

150 lane miles of roadway  
88 miles of paved shoulder  
13 bridges  
375 culverts  
1,074 acres of right-of-way

Present staffing plans:

1 - Subarea Supervisor  
1 - Equipment Operator Specialist  
6 - Equipment Operators

Proposed Facility:

A new subarea shop/office is proposed to be constructed on land to be purchased close to highway right of way. This location will allow good access to the routes covered by this subarea and will provide sufficient land for the subarea facility with adequate room for material storage and a mixing strip.

The building will have approximately 7,000 square feet of space. The space will be subdivided into 2,110 square feet of insulated, weatherproofed, air conditioned office, storage area, KHP office, and six 50' x 16' 4" equipment bays. At least two of the bays will be heated and one will be designed as an equipment wash bay. The building will be used as the headquarters for the subarea crew. The building will also include material and parts storage and garage space for subarea trucks. The bays are sized to house dump trucks equipped with snow plows and material spreaders. The type of building and configuration will generally be left to the project architect to decide based on the site, neighboring structures, and budget limitations.

The project will include the construction of ancillary structures necessary for a subarea facility. This includes a 10 bay equipment storage building, a chemical storage dome, and a salt/sand bunker.

It is anticipated the new facility will affect our operating budget with a reduction of utility bills due to improved energy conservation and improved efficiency of the subarea crew and equipment.

DA-418B

1. Project Title: Update Electrical & Bay Extension Dist. Five Shop - Hutchinson		2. Project Priority: 13																					
3. Project Description and Justification: This project is to consolidate the electrical systems from five different electrical panels located in different portions of the building. This project will also update the main service panel to an 800 amp 3 Phase 208 volt service. This will replace the existing 400 amp service panel that does not meet current code requirements or needs. New wiring is required throughout the building.  The main shop area is currently 40 ft. in depth. The depth of the shop does not allow some current equipment to fit in the shop and creates safety concerns when working on large pieces of equipment. The physical size of the shop and current equipment create safety concerns due to the tight quarters and force some work to be done outside.  This project will also extend the existing bays 30' to the rear of the building with a 120 ft. x 30 ft. addition. The addition portion of the end bay will have a 14 ft. x 16 ft. overhead door to make it a single "drive through" bay. A 3 ton, 100 ft. long overhead single rail crane running across the addition will provide for lifting needs in the extended shop area. The addition will be comprised of brick to match the existing exterior.  An associate architect will be required for this project. # Includes fees (\$8,682) for Division of Facilities Management.

1. Project Title: Construct Area Training/Meeting Facility - Garnett		2. Project Priority: 14																					
<p>3. Project Description and Justification:</p> <p>This project is to construct a meeting/training facility on existing KDOT land at the Area Office Complex in Garnett. The project will provide a facility that accommodates conferences, meetings, and trainings at a location that is more readily accessible to contractors, vendors, and employees. The proposed metal building will have approximately 2,000 square feet of space. The space will consist of a meeting/training area, a kitchenette, a storage/utility room, and ADA restrooms. The meeting/training area will be equipped with audio/video equipment, dry erase boards, and projection screens and will be capable of conducting video conferences. It will be insulated and have a stand-alone climate control system that will provide a comfortable, cost effective, and efficient environment for the users of the facility. The building configuration will generally be left to the project architect to decide based on the site and budget limitations.</p> <p>This area is responsible for the maintenance and construction activities in five counties and currently is staffed at 73 employees to meet the demands associated with this responsibility. The Area Office does not have the ability to provide meeting space for groups larger than 6-8; therefore, many of the meetings with contractors and vendors must be scheduled at locations off-site. Due to limited facilities on-site, much of the training scheduled for the employees is conducted at the District Office in Chanute. This requires the employees involved to travel up to 90 miles one-way to attend the training.</p> <p>It is requested that plans and specifications be prepared and the contract administered by the Division of Facilities Management.</p> <p># Includes fees (\$34,541) for Division of Facilities Management.</p>
