

Testimony Provided to the

**Committee on Natural Resources - March 11, 2015**

Michael Talboy and Stephen R. Hoffine, Burns and McDonnell

**In Support to H.B. 2193**

Burns & McDonnell supports passage of Kansas House Bill #2193, which creates the Risk Management Program at the Kansas Department of Health and Environment Bureau of Environmental Remediation.

This program will provide a tool for cost effective management of sites where there is a low risk to human health and the environment. This program will help to reduce the spend and the use of limited resources on sites that don't warrant it and allow for more attention to be spent on sites with higher levels of potential risk.
