MINUTES OF THE SENATE COMMITTEE ON _____ WAYS AND MEANS _____

The meeting was called to order by _____ SENATOR AUGUST "GUS" BOGINA _____ at
Chairperson

10:15 a.m./p.m. on _____ APRIL 24 _____, 1990 in room 123-S of the Capitol.

All members were present except:

Committee staff present:

Research Dept: Diane Duffy, Leah Robinson, Ellen Piekalkiewicz, Alan Conroy, Scott Rothe, Laura Howard

Revisors Office: Norman Furse, Gordon Self

Committee Staff: Judy Bromich, Pam Parker

Conferees appearing before the committee:

Winston Barton, Secretary, Department of Social and
Rehabilitation Services (SRS)

John Alquest, Commissioner of Income Maintenance and
Medical Services, SRS

Representative David Miller

James Hays, Research Director, Kansas Association of
School Boards

Bruce Roby, Legal Counsel, SRS

Representative Joan Adam

Brenda Manske, Citizen

Representative Vern Williams

Jack McCord, Department of Administration

Gene Johnson, Kansas Alcoholism and Drug Addiction

Counselors Association, Kansas Association of Alcohol
and Drug Abuse, Kansas Community Alcohol Safety Action
Project Coordinators Association

John Smith, Driver Licensing and Control

The Chairman explained that due to the apparent lack of implementation of additional revenue measures during the legislative session, he felt the need to look at some appropriations which far exceeded expectations. Therefore, he had requested a report from the Department of Social and Rehabilitation Services (SRS) reviewing federal mandates and illustrating areas where the state of Kansas exceeds federal mandates, case loads, etc. Distributed for Committee members was a Summary of SRS Budget for FY 1989-1991 prepared by the Kansas Legislative Research Department. (ATTACHMENT 1)

Winston Barton, Secretary, SRS, distributed copies of charts he reviewed regarding program history of some of the major programs of SRS, i.e., Aid to Families with Dependent Children (AFDC), Medicaid, Foster Care and Long Term Care. He also discussed difficulties in trying to forecast the future of these programs. (ATTACHMENT 2)

During discussion of AFDC, Secretary Barton stated that they would like to think that programs like Kan-Work would cause the caseload to decrease, however that has not been true. In some instances, it has caused the caseloads to increase because people stay in the program longer to finish training or obtain a GED. They used to think that caseload growth or decrease was due to unemployment, but they have found that is not necessarily so.

CONTINUATION SHEET

MINUTES OF THE SENATE COMMITTEE ON WAYS AND MEANS,
room 123-S, Statehouse, at 10:15 a.m./~~p.m.~~ on APRIL 24, 1990.

In regard to Foster Care, Secretary Barton stated that the \$32.2 million quoted in the FY 1991 GBR does not include the present 10 percent increase or caseload growth. They are forecasting a 15 percent caseload increase as well as an increase in cost of care due to the children needing more expensive services. The FY 1990 Maintenance Level figure of \$41.8 million does include the present 10 percent increase. Commissioner Barnum answered a question by stating that the federal match for Foster Care is generally a 48 - 52 percent for 4-E, however it depends whether the recipient is AFDC, GA, etc. as those matches vary somewhat. What they expect to get in Foster Care is about \$11 million in federal funds, most of which is probably 4-E and child welfare.

John Alquest talked about what was happening within the Regular Medical Assistance Program this year. (Attachment 3) Mr. Alquest stated the Pregnant Women and Children expansion is drawing more people who are also eligible for AFDC due to income level relating to unemployment and inability to work because of medical conditions, etc. He noted that it takes about all of their energies to operate the programs and they do not have a research arm to study demographics, etc. He said the computers are set up right now to process the factors of eligibility, there is potential within the computer, at additional costs, to be able to gather management data. J. Sanford Duncan, SRS, stated that the computer was not designed to be a statistical analysis tool.

Mr. Alquest responded to a question by stating that an increase in medical programs is being experienced all over the country at the state and federal level due, in part, to the aging population and the need for more expensive care as they age as well as nursing home care. Data indicates surrounding states have higher medical assistance expenditures overall than Kansas, particularly Oklahoma. In Mr. Alquest's opinion Kansas is serving approximately one-third of the people who are potentially eligible for AFDC.

Mr. Alquest stated SRS does not pay for hospital admission unless medical necessity has been demonstrated. Under the DRG system the review is a post review of 30 - 60 days later. Katie Klaussen stated that between \$10 and \$12 million per year is denied from hospital payments because of lack of medical necessity. They have not done a comparison study of what the state pays in hospital costs versus private insurers, but that is something that they could do.

During discussion, Mr. Alquest stated that his report is not so much to explain "why" these things are happening, but to explain "what" is happening. There is an increase in the number of people getting medical cards in addition to a greater use of services by those already having cards. Secretary Barton explained that people receiving medical cards presently are more at risk medically.

SB 793 - Omnibus Appropriations Act of 1990

Senator Doyen submitted a letter dated April 12, 1990 to Paul West, Legislative Research, to Harland E. Priddle regarding a response to a request from Senator Doyen to identify some improvement programs for exhibition and display materials. (Attachment 4)

Senator Doyen moved, Senator Hayden seconded, to amend SB 793 by adding \$25,600 for a display program for recruitment efforts for film services. The motion carried.

CONTINUATION SHEET

MINUTES OF THE SENATE COMMITTEE ON WAYS AND MEANS,
room 123-S, Statehouse, at 10:15 a.m./~~p.m.~~ on APRIL 24, 1990.

INTRODUCTION OF BILLS

Senator Doyen moved, Senator Rock seconded the introduction of bill draft 9 RS 2937, an act defining land devoted to open space for property taxation purposes. The motion carried.

Senator Allen moved, Senator Doyen seconded, the introduction of a bill which would provide a two and one-half percent cut of all state general fund appropriations. Part of the motion was to assign the bill to Senate Ways and Means Committee. The motion carried.

Senator Winter moved, Senator Gaines seconded, the introduction of a bill consistent with an opinion from the U.S. Supreme Court on April 18, 1990 upholding a law in Ohio which banned child pornography. The motion carried.

SB 793 - Omnibus Appropriations Act of 1990

Staff reported that the Joint Committee on State Building Committee has recommended that the provision be added to the Omnibus Appropriations bill authorizing the State Finance Council to authorize the KDFA to issue bonds for the acquisition and renovation of the Victory Life building. The Building Committee also recommended to authorize KDFA to issue \$1.49 million in bonds for the acquisition of the Santa Fe building in Wichita for the Department of Corrections. The Building Committee recommended the authorization of shifting funds at KCIL for life safety improvements with a portion of the previous funds for the KCIL dormitory. The next item reviewed by staff was the Kansas University Press. Last year the legislature authorized KU to build a new office building. They have not achieved quite as much revenue as they had hoped. The Building Committee recommends they be authorized to issue revenue bonds up to \$250,000 to complete that project. The last item was the Plant Science project at Kansas State University. Inadvertently there has never been legislative authorization for them to obliterate the old foundations of the greenhouses.

Senator Harder moved, Senator Gaines seconded, the above recommendations of the Joint Committee on State Building Construction.

Following discussion, Senator Winter made a substitute motion, Senator Kerr seconded, to adopt the recommendations made by the Joint Committee on State Building Construction except for the acquisition of the Victory Life Insurance building. The motion failed.

The primary motion by Senator Harder and seconded by Senator Gaines passed.

Senator Doyen moved, Senator Harder seconded, to introduce the Omnibus Appropriations Act of 1990 as amended. The motion carried.

Senator Kerr moved, Senator Feleciano seconded, to recommend the Omnibus Appropriations Act of 1990 (SB 793), as amended, favorably for passage. The motion carried on a roll call vote.

The meeting was recessed for lunch.

CONTINUATION SHEET

MINUTES OF THE SENATE COMMITTEE ON WAYS AND MEANS,
room 123-S, Statehouse, at 10:15 a.m./~~p.m.~~ on APRIL 24, 1990.

The Chairman called the meeting to order at 1:45 p.m.

HB 2586 - Sub. for HB 2586 by Committee on Appropriations -- Mental health reform act.

Senator Kerr explained his amendment. (Attachment 5) During discussion, Mr. Nemec, SRS, stated that he thought the intent was that the counties would participate up to at least a minimum of 75 % of what the state is putting into the mental health center operations for that catchment area.

Senator Kerr moved, Senator Doyen seconded, to amend Attachment 5 to read, "... 75% per capita of the State Aid and grants". During discussion, Mr. Nemec stated that the amount of mill levy funding that goes to the Centers is almost equal to the state match. The motion failed.

The Chairman stated that a letter had been received from District Judge Paul Miller, Chairman of Legislative Coordinating Commission, which expressing concerns they have which had been considered by the Senate Public Health and Welfare Committee. (Attachment 6) Staff stated that the information the Public Health and Welfare Committee had related to broadening the QFAP definition to allow health professionals in communities without local mental health centers to make appropriate recommendations.

Senator Winter moved, Senator Parrish seconded, to amend Section 26 (f) to read, "...from a qualified mental health professional. In the event the qualified mental health professional does not recommend treatment at a state psychiatric hospital, the participating mental health center which employs a contracts with the qualified mental health professional shall assume responsibility for securing any and all treatment required by the proposed patient. An order for treatment in a treatment.....". The motion carried.

Senator Parrish moved, Senator Winter seconded, to amend Sub. for HB 2586, Page 34, line 37, New Section 30, by changing the January 1, 1991 to January 1, 1992. The motion carried.

Senator Johnston moved, Senator Parrish seconded, to report Sub. for HB 2586, as amended, favorably for passage. The motion carried on a roll call vote.

Following a short break the Vice-Chairman called the meeting back to order.

HB 2900 - State finances, governor's executive orders to reduce appropriations and demand transfers from state general fund.

Representative David Miller appeared before the Committee in favor of HB 2900. Representative Miller stated that this bill permits the Governor the flexibility to make across the board cuts in virtually all appropriations, expenditures or transfers from the State General Fund if two conditions are met. One that the cash ending balance of the SGF were projected to drop below five percent, and two, if the state Finance Council approved of the action. Exemptions voted on by the House Appropriations Committee include appropriations for bond payments and KPERS retirement for teachers.

In answer to questions, Representative Miller stated that he felt HB 2900 compliments HB 2867 (the spending lid bill) and would act as a backup. He agrees with the administration's position that the five percent is necessary for escrow purposes and emergencies.

James Hays, Research Director, Kansas Association of School Boards, appeared in opposition to HB 2900. (Attachment 7)

CONTINUATION SHEET

MINUTES OF THE SENATE COMMITTEE ON WAYS AND MEANS,
room 123-S, Statehouse, at 10:15 a.m./p.m. on APRIL 24, 1990

HB 3085 - Social Welfare, payment schedules for health care providers.

Bruce Roby was the next conferee. (Attachment 8) Written testimony was submitted by Dick Hummel, Executive Vice-President, Kansas Health Care Association (KHCA). (Attachment 8-A)

HB 2859 - Heritage trust fund established for purpose of historic preservation.

Representative Joan Adam was next to appear. (Attachment 9 and 10) During discussion of a proposed amendment submitted by Senator Winter (Attachment 11), Representative Adam suggested a large match for for-profit businesses or organizations. It was her intention for this money to be used for those properties that are falling down and those facilities that have great historical significance. Her preference is that the money be kept for historic preservation purposes having to do with history and/or architecture. This should be considered being a statewide benefit.

Representative Adam distributed copies of written testimony provided by Don Chubb, President of Historic Topeka, who was unable to be present. (Attachment 12)

Written testimony was submitted and reviewed for Ramon Powers, Executive Director, Kansas State Historical Society, by a representative of the Historic Society. (Attachment 13) He stated that the elimination of for-profit entities for competing for this money would have a negative effect on some of the mainstreet programs. The Historical Society would not be adverse to an additional match for these as compared to a private homeowner or a non-profit organization. They feel that the return of funds collected in counties would be an administrative nightmare and would be counter productive in relation to requirements set out in the bill. He stated that they would be happy to work on further amendments with Senator Winter and staff.

Brenda Manske appeared as an interested citizen. (Attachment 14) She stated she was formerly director of the Southeast Kansas Tourism Region and past president of the Kansas Downtown Development Association.

Submitted for the record was testimony from Trudy Aron, Executive Director, The Kansas Society of Architects, AIA (Attachment 14-A), and Linda Fincham, Chairman of the Register of Deeds Legislative Committee (Attachment 14-B).

HB 2719 - State affinity credit card program for members of retirement systems under KPERS

Representative Vern Williams appeared before the Committee. (Attachment 15) In answer to questions, Representative Williams stated that the cards could be used for identification purposes. Concern was expressed concerning the size bank that would administer this program.

Jack McCord stated that this was an opportunity to offer a benefit to state employees at no cost which is unusual. It is also a voluntary action on the part of the individual employees as to whether they want to participate or not. The successful vender will be the one who submits the lowest bid for the annual fee to be paid for the card, the lowest interest rate above prime, and the rate paid to the state as a pursuing a business.

CONTINUATION SHEET

MINUTES OF THE SENATE COMMITTEE ON WAYS AND MEANS,
room 123-S, Statehouse, at 10:15 a.m./~~p.m.~~ on APRIL 24, 1990.

SB 770 - Examination and reinstatement fees for drivers' licenses.

Gene Johnson presented testimony in support of SB 770. (Attachment 16)

John Smith (Attachment 17) stated that currently there is a \$25 reinstatement fee in addition to any fines and court costs. That is \$25 for each charge regardless of the outcome. They are proposing to raise that to \$50. They also intend to increase the examination fee from \$3 to \$5 for those individuals convicted of DUI who must submit to a driving examination. Mr. Smith stated that this will cause no additional work because the court currently collects the reinstatement fee now and the examiner in the field collects the fee. The additional examination fee would stay in the Highway Fund and the additional reinstatement fee would go to the alcohol program. There are about 5,000 DUI convictions per year not counting diversions. There are approximately 25,000 who fail to appear, many of which are dual charges if not more.

Mr. Smith asked that line five, page three, the reference be changed from subsection (f) to subsection (e).

SB 751 - Elimination of nonjudicial employees salary payback provision.

Attachment 18 illustrates the collections they have made to date on the 10 day payback. He explained it is not really a collection, it is a reduction of the final paycheck.

HB 3076 - Fiscal notes on legislative bills, preparation and distribution.

The Chairman briefly reviewed the bill and there was a short discussion.

The Chairman announced the next meeting will be a 1:30 p.m. on Wednesday, April 25th.

Omnibus Reconciliation Act of 1989

Obstetrical and Pediatric Services

Effective April 1 states must provide assurances that fee for service payment rates for obstetrical and pediatric practitioner services are high enough to assure these services are available to the Medicaid population. This has been defined as at least 90 percent of the average allowance (weighted by frequency) of private insurers. It is believed that rates set at the 75th percentile of provider profiles should assure the availability of these services to all Medicaid recipients.

\$6,775,270

\$3,184,377 SGF

Kan Be Healthy (EPSDT) Services

Effective April 1 states must provide assurances that rates paid for health screenings of children are high enough to assure that 80 percent of all eligible children are screened and that all medically necessary services discovered through screenings are provided. SRS screens about 30 percent of all eligible children, and must increase screens by 10 percent each year until the requirement is met. To determine the cost of providing all services found medically necessary, services for foster children were reviewed. These are paid as provided. It was assumed that 55 percent of children in Kan Be Healthy would receive these expanded services.

\$8,505,895

\$3,997,771 SGF

Federally Qualified Health Centers

Effective April 1 states are required to reimburse federally qualified health centers at 100 percent of reasonable costs. These include Community Health Centers eg. Hunter Health Clinic in Wichita and Migrant Health Centers in Garden City. Specifications describe the services that are included as physician nurse practitioner, psychologist, clinical social worker and others. To determine reimbursement an interim rate will be set based on cost reports submitted by the facility and will be adjusted annually to audited costs.

\$203,104

\$81,485 SGF

Medicare Buy-In For Certain Working Disabled

Effective July 1 states must cover Medicare Part A premiums and cost sharing requirements for working disabled persons who lose social security benefits because of excess income. The qualifying level for medical coverage is 200 percent of the federal poverty level and resources not to exceed \$4,000 for a single individual and \$6,000 for a couple. It has been found that the vast majority of those who apply are already on the regular MA-Disabled program. The small number remaining (about 30 persons per year) is assumed would be healthy, therefore, the cost beyond the monthly premium would be the same as other Qualified Medicare Beneficiaries, approximately \$12 per month.

\$91,584

\$39,381 SGF

Medical Assistance Cost Management Strategies

The strategies for FY 1991 cost reductions shown below have been refined from the original list presented as suggestions to the House Appropriation Committee and the Senate Ways and Means Committee. These are considerations by SRS for reducing the budget if that becomes necessary. These are not in any priority order. Priority must be determined later by the amount of reduction necessary and the extent of need for the service.

Strategy	Start Date	Annual SGF Reduction	FY91 Pipe-line SGF Reduction	FY91 Total Annual Reduction
<u>Persons Eligible</u>				
1. Eliminate coverage of adults in medically needy families	7-1-90	\$2,700,000	\$2,100,000	\$6,100,000
<u>Medical Services</u>				
1. Give no hospital rate increase	7-1-90	\$2,900,000	\$2,900,000	\$6,200,000
2. Additional Copayment	7-1-90	\$1,200,000	\$ 970,000	\$2,300,000
3. Tighten criteria for psychiatric admission for both children and adults	7-1-90	\$3,300,000	\$2,700,000	\$6,250,000
4. Discontinue coverage of mental health services except CMHC and psychiatric services by physicians	8-1-90	\$ 280,000	\$ 220,000	\$ 480,000
5. Make psychotherapy content of service of partial hospitalization for the long-term mentally ill	8-1-90	\$ 60,000	\$ 50,000	\$ 140,000
6. Reduce allowed hours of psychotherapy for all recipients except children screened through KAN Be Healthy to 10 hours individual and 20 hours group and family combined per year	8-1-90	\$ 363,000	\$ 285,000	\$ 620,000

Strategy	Start Date	Annual SGF Reduction	FY91 Pipe-line SGF Reduction	FY91 Total Annual Reduction
7. Reduce all rates 5% except Omnibus Budget Reconciliation Act of 1989 changes and inpatient hospital	7-1-90	\$1,800,000	\$1,560,000	\$3,320,000
8. Reduce Primary Care Network case management payment by 50%	6-1-90	\$ 330,000	\$ 330,000	\$ 705,000
9. Eliminate coverage of all sole source (brand name) prescription drugs	7-1-90	\$5,709,000	\$5,367,000	\$12,304,000
10. Contract for selected drugs and family planning products through bidding	7-1-90	\$ 464,000	\$ 436,000	\$1,000,000
11. Reimburse only for specific drugs when the diagnosis meets established criteria	7-1-90	\$ 232,000	\$ 220,000	\$ 500,000
12. Reduce maximum rates for procedures above the 50th percentile to the 50th except for specified procedures	7-1-90	\$ 40,000	\$ 35,000	\$ 86,000
13. Reduce Home Health Agency services to Medicare guidelines	8-1-90	\$ 850,000	\$ 660,000	\$1,585,000
14. Eliminate Home Health, occupational therapy, physical therapy, and speech therapy for adults	8-1-90	\$ 27,000	\$ 21,000	\$ 54,000
15. Reduce all physician office visits for adults to a total of 2 per year	8-1-90	\$ 760,000	\$ 618,000	\$1,500,000
16. Reduce office visits for KAN Be Healthy to a total of 12 per year	8-1-90	\$ 22,000	\$ 18,000	\$ 46,000
17. Cover liver and heart transplants for children only thru KUMC	8-1-90	\$ 230,000	\$ 168,000	\$ 403,000

Strategy	Start Date	Annual SGF Reduction	FY91 Pipeline SGF Reduction	FY91 Total Annual Reduction
18. Delete the following optional services for adults: optometric except for medical conditions of the eye, audiology, chiropractic, podiatry and dental except oral surgery and dental care for severe medical conditions that are prior authorized	8-1-90	\$ 355,000	\$ 288,000	\$ 548,000
19. Eliminate Hospice Services except for Qualified Medicare Beneficiaries	8-1-90	\$ 227,000	\$ 177,000	\$ 448,000
20. Tighten criteria for Medical necessary diagnostic and surgical procedures	7-1-90	\$ 518,000	\$ 424,000	\$1,100,000
21. Cover only substance abuse detoxification in general hospitals. Continue to federally match Alcohol and Drug Abuse Services SGF for community treatment programs	8-1-90	\$ 766,000	\$ 555,000	\$1,330,000
22. Eliminate non-ambulance medical transportation and selected non-emergency ambulance transportation for non-KAN Be Healthy participants	8-1-90	\$ 338,000	\$ 254,000	\$ 642,000
23. Eliminate coverage of durable medical equipment, orthotics and prosthetics for adults	7-1-90	\$ 937,000	\$ 749,000	\$2,011,000
24. Make psychotherapy content of services for all inpatient hospitalizations	8-1-90	\$ 397,000	\$ 288,000	\$ 689,000
Total Reduction		\$24,805,000	\$21,393,000	\$50,961,000

SUBJECT: RESPONSE TO A REQUEST FROM SENATOR DOYEN

Senator Doyen and Senator Vidricksen attended the film exposition with our film services staff in Los Angeles this year. Upon their return, both of them expressed a desire for us to identify some improvement programs for exhibition and display materials at such shows as the Los Angeles Film Exposition.

In order to provide and meet the needs as outlined by the Senators in their discussions with our staff as well as myself, we believe we can develop an excellent display program for approximately \$25,600. This would include booth materials, display materials, and would meet the standards being used by other states in their recruiting efforts for film services and activities into their states.

We wanted you to be aware of this request and our staff actions in response to their suggestions.

Senator Gus Bogina
Chairman, Ways and Means Committee
State Capitol
Topeka, Kansas 66612

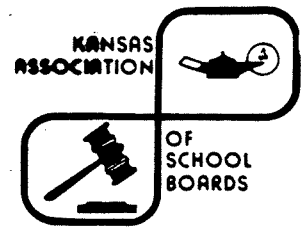

Gentlemen:

I write on behalf of the Kansas District Judges' Association. At a meeting of our Executive Committee, held on March 15, 1990, it was unanimously resolved that the Association recommend that Substitute House Bill 2586 be amended to broaden the definition of "qualified mental health professionals" to allow those health professionals in communities without local mental health centers to make the appropriate recommendations and referrals required by the proposed bill. Our concern is that there are a number of counties throughout Kansas that do not have local mental health centers and that the definition of "qualified mental health professional" found in the bill will make it difficult, if not impossible, for emergency mental illness cases to be appropriately treated. We would appreciate your consideration of this request and if you need further input, please do not hesitate to contact me.

Very truly yours,

PAUL E. MILLER
District Judge
Chairman, Legislative Coordinating Comm.

Joint Testimony on HB 2900
before the
Senate Committee on Ways and Means
by
James Hays, Research Director
Kansas Association of School Boards

for
Kansas Association of School Boards
Kansas-National Education Association
United School Administrators
Unified School District No. 512 (Shawnee Mission)
Unified School District No. 259 (Wichita)
Unified School District No. 229 (Blue Valley)
Unified School District No. 501 (Topeka)
Schools for Quality Education
Schools for Equal Education in Kansas

Mr. Chairman and members of the Committee, we appreciate the opportunity to testify today on behalf of the school districts and organizations listed above.

We oppose HB 2900. Current law permits the Governor to impose allotments upon any fund which, in the view of the Director of the Budget, is likely to end the fiscal year with an ending balance of \$0, or less. This law has been used since its enactment to regulate the fiscal stability of certain fee fund agencies, and has been used to reduce spending during times of extreme emergency in the State General Fund.

The essential changes in HB 2900, from current law, are that the ending balance necessary to trigger this process is not \$0, but is 5%

ATTACHMENT 7
SWAM 4-24-90

of total annual spending, **and** all items of State General Fund demand would be subject to reduction by the Governor. This would include demand transfers of revenue from the State General Fund. Furthermore, the Governor would have no ability to manage the revenue shortfall which presumably would occasion these reductions because the bill would require that he cut equally from all areas of spending. Current law does not restrict the Governor, in making allotments, from continuing some expenditures and diminishing others.

We believe that requiring pro-rata reductions from every item of expenditure is illogical and bad public policy. You and I would not manage our personal affairs that way. A business would not manage its finances that way. Some expenditures we make as individuals, and businesses make are so important that we would continue to make them regardless of how diminished our revenues might be. And some expenditures we make might be better not made at all, rather than to be reduced by some arbitrary percentage. We urge you to retain for the Governor the right, **and the responsibility**, to manage state government as any chief executive officer would manage his corporation.

As representatives of local school boards and professional educators, we are particularly concerned with including the School District Income Tax Rebate program under this bill's blanket expenditure reduction process, but we are confident that our concerns will be echoed by all others similarly affected by other demand transfer mechanisms. Demand transfers are creations of the Legislature fundamentally different from the appropriations process. The Income Tax Rebate is not a state aid program; it is an alternative local revenue source tied to a state revenue source. The Legislature created the program in this way

precisely because it was expected to operate in concert with a state aid appropriation. The program rebates to each of the 304 local school districts a portion of the resident individual income tax liability of each and every taxpayer living in that school district. The Legislature does not have to decide on a total amount each year; it is decided for you by the amount of tax liability accruing. You do not have to decide on a distribution formula; it is decided for you by the address lines on the taxpayer's return form.

We are at a loss to understand how the Governor and the Director of the Budget would go about exercising the powers HB 2900 would grant them over the Income Tax Rebate. Presumably, the occasion to make these reductions would come from some revenue shortfall, probably associated with an economic downturn in the state. In all likelihood, the income tax would be affected by this economic downturn. So, the Rebate program would have been already automatically reduced in total by a shortfall in liabilities; what is the need to reduce it still further? But reductions in the rebate due to this economic downturn would affect different school districts different ways. One district may be a "white collar" area of suburban commuters and may be relatively unaffected by the economic downturn; their rebate may be very close to "normal". Another district may have suffered layoffs of hundreds or thousands of aircraft workers; their rebate may have already been reduced by 25% or 30%. Are we to understand that the Governor would be required to instruct the Director of Accounts and Reports to reduce both of those districts next rebate checks by some percentage? How would he know how much to reduce the check by? Total disbursements during any particular fiscal year under the rebate program are, unlike

an appropriation amount which is certain, unknown until they are actually made. They are affected somewhat by the speed of processing in the Department of Revenue. If the Governor is working from the total estimated disbursements in calculating his percentage reduction, and this revenue shortfall occurs in the second half of the fiscal year, it is possible that a school district may have already received the money he is trying to cut. Can the Governor ask them to send it back?

In summary, we believe that including demand transfers in this process is illogical and unworkable. The wisdom of current law in excluding them from the allotment process should be thoroughly reviewed before changes are made.

Thank you for the opportunity to discuss this matter with you. We would be happy to answer any questions.

KANSAS DEPARTMENT OF SOCIAL AND REHABILITATION SERVICES
Winston Barton, Secretary

Testimony presented to
Senate Committee on Ways and Means

April 23, 1990

Statement Regarding: H.B. 3085

TITLE:

AN ACT concerning social welfare; relating to payment schedules for health care providers; amending K.S.A. 39-708c and repealing the existing section.

PURPOSE:

This bill updates and amends state statutes regarding the Secretary's duties to establish payment schedules for health care providers, and clarifies that, for hospital and adult care home providers under the State Medicaid plan, the payment schedules shall be "reasonable and adequate to meet the costs which must be incurred by efficiently and economically operated facilities."

BACKGROUND:

This bill is in response to concerns about growth in the adult care home budget which is projected to continue in FY 1990 and FY 1991. While average annual growth in the cost of long-term care was 8.4 percent from FY 1979 to FY 1989, the rate of growth has been increasing. Long-term care costs grew 13.2 percent from 1987 to 1988, and 15.4 percent from 1988 to 1989. In discussions with the House Appropriations Subcommittee, we reviewed previous efforts to contain adult care home costs and noted that litigation often resulted. To clarify legislative intent that adult care home reimbursement be as efficient and economical as possible, we have proposed these provisions.

These amendments to K.S.A. 39-708c(x) would have three main purposes:

1. To update the provider payment provisions to include specific terms from the federal Medicaid "Boren Amendment" which replaced the "reasonable cost-related" standard with a lower, reasonable and adequate, standard for Medicaid payments for adult care home and hospital services.
2. To reduce the confusion from pre-Boren Amendment lawsuits in Kansas and to specify that federal law now allows consideration of budget restraints (as long as the rates otherwise meet federal requirements), that rates are only to meet efficient costs, and that the state program is not to be required to use all state funds for any services or rates that do not meet federal requirements for federal match payments.
3. To clarify or specifically grant the authority to place exclusion or moratorium limits, within the provisions of federal law, on unnecessary services.

EFFECT OF PASSAGE:

Passage of H.B. 3085 would better enable SRS to defend proposed changes in the adult care home reimbursement system which may be challenged by litigation and to better manage continued growth in this program.

Kansas Health Care Association

221 SOUTHWEST 33rd STREET
TOPEKA, KANSAS 66611 • 913-267-6003

To: Senate Ways & Means Committee
From: Kansas Health Care Association
Date: April 24, 1990
Subject: Position on HB 3085

HB 3085 amends K.S.A. 39-708c(x) (page 5, line 10) as follows:

"Any payment schedules which are a part of the state medicaid plan shall conform to federal law." This is currently the law (federal and state) with respect to Medicaid Plan payments that qualify for federal financial participation. At the present time, there may be parts of the state Medicaid Plan which do not meet requirements for federal participation. In the future, SRS may adopt, under the state Medicaid Plan, programs which will not meet requirements for federal financial participation.

The second sentence of the proposed amendment would seem to limit any payments for state Medicaid Plan programs which do not meet the requirements for federal financial participation.

"(1) The secretary shall consider budgetary constraints as a factor in establishing payment schedules so long as the result complies with federal law."

ATTACHMENT 8-A
SWAM 4-24-90

Federal court decisions clearly recognize that a state Medicaid agency may consider budgetary constraints. Those same federal cases require any state Medicaid Plan for reimbursement to comply with federal law. The proposed amendment is nothing more than a repeat of current federal law.

"(2) The secretary shall establish payment schedules for providers of hospital and adult care home services under the medicaid plan that are reasonable and adequate to meet the costs which must be incurred by efficiently and economically operated facilities in order to provide care and services in conformity with applicable state and federal laws, regulations, and quality and safety standards. The secretary shall not be required to establish rates for any such facility that are in excess of the minimum necessary to efficiently and economically meet those standards regardless of any excess costs incurred by any such facility."

The first sentence is taken verbatim from 42 U.S.C. § 1396(a)(13)(A), and is, therefore, a repeat of current federal law. It has long been recognized that the Medicaid program is a voluntary program but once a state has decided to participate in the program, the standards for reimbursement become obligatory upon the state. (Country Club Home, Inc. v. Harder, 228 Kan. 756, modified at 228 Kan. 802 (1981).

As stated above, the second sentence is not necessary in that the state Medicaid reimbursement system must comply with federal law (42 U.S.C. § 1396(a)(13)(A) and numerous federal and state court decisions). Additionally, such an amendment is absolutely meaningless unless a definition can be provided for the term "efficiently and economically" and the term "minimum necessary." The current reimbursement system provides that a long term care home can be reimbursed its cost or the SRS established cost center limit, whichever is less. The only portion of the current reimbursement system which is not supported by actual expenditures involves the "efficiency factor." The efficiency factor can range from zero to fifty cents per patient day.

Long term care providers are currently regulated (i.e., standards are enforced) by the Kansas Department of Health and Environment and the Health Care Financing Administration. The Congress, HCFA and KDHE often times require additional standards (additional money must be spent), and long term care facilities are unable to be compensated for up to one year for the cost they must incur to meet new standards. (For example, OBRA '87 requirements were first calculated by SRS to be in excess of 6.2 million dollars. That figure has now been reduced by the Subcommittee to 1.7 million dollars. The federal minimum wage was first calculated by SRS to cost an excess of 6.6 million dollars, and that figure has been reduced to nothing by the Subcommittee.)

"(3) The secretary shall have the authority to refuse to enter into contracts with any health care provider providing medicaid services if such exclusions or moratoriums comply with federal law."

It is hard to determine from the language quoted just exactly what paragraph (3) intends to do. There is no definition of "exclusions or moratoriums." At present SRS enters into contracts with providers on a one year basis; there is nothing in the present law which requires SRS to enter into contacts with providers - SRS can presently refuse to enter into contracts.

In summary, it would seem that K.S.A. 39-708c(x) as amended, the only thing necessary to bring the statute within the framework of current federal law is the sentence which states, "Any payment schedules which are part of the state medicaid plan shall conform to federal law." All additional language of the proposed amendment is surplus and can only add additional confusion to the present reimbursement system.

HB 2859
 April 23, 1990

Mr. Chairman and members of the Senate Ways and Means Committee:

I greatly appreciate your willingness to allow a hearing on this bill, especially given the lateness in the session.

I want to conserve time as much as possible for others who wish to express their support for this bill, so I would like to quickly describe what this bill will do, discuss the amendments that were added in the House and finally discuss some additional changes for your consideration.

This bill is intended to provide funding for the repair and rehabilitation of historic buildings in Kansas - specifically those listed on the National or State Register of Historic Places. Funding for this bill will come from a one-penny increase in the mortgage registration tax. As you recall this tax is now levied at the rate of 25 cents per \$100 registered. That amount is retained in the county general fund. This bill will make that tax 26 cents and the extra one penny will be sent to the state on a quarterly basis to the state treasury to be deposited in the Heritage Trust Fund. The Historical Society will then use this money as matching grants for properties to qualify through an application process. The Society will use an application process similar to one they used in the late 1970's when for a period of time the federal government provided money for a similar purpose.

Based on 1988 revenue of \$14.5 million from the mortgage registration tax, the fund could expect revenue in the amount of \$580,000. If distributed on a matching basis this amount will make a dent in restoring and rehabilitating properties which often have been neglected for years. Often a relatively small grant can encourage substantial restoration. The involvement of the state Historical Society's professional staff will also encourage the work to be done in a professional way.

That basically describes the bill. Now let me describe the amendments added in the House.

The House Appropriations Committee added two amendments, one which would permit the Historical Society to set up a revolving loan fund. It was felt that such a fund would extend the use of the money and I think the Historical Society is interested in pursuing this approach with a portion of the funds. The other amendment added in Committee lists factors which the Historical Society should consider - factors such as the architectural and historic significance of the building, financial need of the applicant and geographic location of the property.

ATTACHMENT 9
 SWAM 4-24-90

On the House floor two amendments were added - one which denies the use of these funds to any member of the legislature and the other amendment states that 50 percent of this money shall be used by county historical societies which own qualifying property.

Although I support this concept of local historical societies receiving a definite portion of the funding, it was only after the floor debate that we learned that there are only 30 qualifying local Historical Society properties thus these 30 buildings would have access to approximately \$290,000 while all of the other properties would share the other \$290,000. I have provided suggested language that would broaden the local historical societies category, to include property owned by local governments, by private non-profit preservation groups such as Historic Topeka. Under this language 200 properties would be eligible rather than the 30 covered under the present language. This completes my discussion of the amendments added in the House.

Informal discussions of this bill during the last few weeks generated another possible amendment that both the authors of the Bill and the Historic Society would approve of - that is a recapture provision. This would allow the Historical Society to recapture part of the grant money if the building were sold within five years of receiving the grant. I have attached a draft of such an amendment. That completes the discussion of the Bill in general. I would like to close by listing some of the benefits of this bill.

- The state of Kansas has a state policy of protecting and rehabilitating historic property. This bill will help accomplish that stated statutory goal.

- The Bill will augment economic development activities by many cities and counties. Many local governments have found historic property to be a boon to their tourism effort and economic development.

- The trust fund will benefit not just owners of historic properties but will benefit all Kansans by enriching their awareness of Kansas cultural heritage.

- A funding program will make the difference between making it and not making it for many of the historically significant properties in Kansas.

- Thirty-two states now have some form of financial incentives for preservation, including income tax relief, property tax relief, state grants and loans allow Kansas to join that group.

* * * * *

Revision to H.B. 2859

The sentence on lines 39 to 42 which was inserted as an amendment on the floor of the House should be revised to read as follows:

At least 50% of the amount awarded annually in grants shall be used for the preservation of eligible properties owned by county and local governments, county and local historical societies, and by private non-profit organizations.

Amendment to House Bill 2859

Insert on page 2, line 4, after "this section."

In counties having more than 300,000 population, the state historical society may also award grants from this fund for the purposes of conducting cultural resource surveys, preparing National Register nominations, preservation plans, and historic preservation educational materials, and disseminating information on historic preservation.

Properties marked through with a line are owned by the State or Federal government and would not be eligible for the proposed heritage Trust Fund grants.

Revision to H.B. 2859

This section may be inserted as an amendment by a member of the Senate Ways and Means Committee to address provisions for the recapture of grant funds. This amendment could be inserted as new subsection 2(a)(3) on page 2.

(3) The state historical society shall establish provisions to recapture grant moneys in accordance with the following factors: If an approved rehabilitated building is held by the grantee for longer than five years after the completion of the grant project, there is no recapture of the grant funds; if the owner, or designated heir (in the case of the owners death), disposes of the property after a holding period of less than one year after the completion of the grant project, 100% of the grant is recaptured; for properties held between one and five years, the grant recapture amount is reduced by 20% per year.

The state historical society may inspect a rehabilitated property at any time during the 5-year period and may revoke or invalidate the approval if work was not undertaken as presented in the grant application or if further unapproved alterations have been made. Modifications made during the five year period following the completion of the grant shall be made in accordance with standards established by the state historical society.

SWAM 4-24-90

I'm Don Chubb, President of Historic Topeka, but my comments could easily have come from dozens of other local historical societies around the state.

We are primarily interested in historic preservation. While publicly owned buildings are nice, most restorations are done by private individuals, and the most cost effective way to maintain an older building is for an individual to live in it, or work in it, and maintain it for the use it was originally intended.

Our old buildings are an important asset to Kansas. Tourism brochures generally include pictures of our nicer older homes, and the downtowns that have the original store fronts are often the ones that are prospering. But restoration is expensive. Groups such as ours work to try to match people and endangered buildings, but the cost is often prohibitive. One problem is financing. Banks and savings and loans are often reluctant to loan rehabilitation money for properties in marginal neighborhoods or downtown areas - the places where historic buildings usually are located.

Another problem is that historic buildings frequently have a serious problem which an owner cannot afford to repair, but which threatens the existence of the building. Roof repairs, foundations, and steam boiler failure are examples. This bill would provide funding for these problems, especially where the existence of important private structures is concerned. It will tell preservationists that Kansans value their efforts to save our physical heritage. I urge your support.

Thank you.

SWAM 4-24-90

TESTIMONY OF RAMON POWERS, EXECUTIVE DIRECTOR, KANSAS STATE HISTORICAL SOCIETY, TO THE WAYS AND MEANS COMMITTEE OF THE SENATE CONCERNING H.B. 2859, APRIL 20, 1990

As the executive director of the State Historical Society, I am pleased that the Ways and Means Committee has given opportunity for this hearing on the heritage trust fund bill. The Historical Society enthusiastically endorses the concept of a heritage trust fund; such a program of direct financial assistance to owners of historic buildings is much needed and would be a logical complement to the other components of the agency's historic preservation program and would be consistent with the intent of the state historic preservation legislation.

We worked with Representative Adam on the concepts embodied in the bill and have continued to work to refine it with her and the cosponsors, Representatives Fuller, Jenkins, and Wagnon, since its introduction and even after its passage by the House of Representatives. After analyzing the changes that were made to the bill on the House floor, the Historical Society believes that some clarifications are needed, which we understand Representative Adam also supports.

Very briefly, we urge a modification to the House amendment which presently requires that fifty percent of the funds credited to the heritage trust fund go to county historical societies. Presently, fewer than thirty buildings owned and operated by county historical societies are listed on the national or state registers. That amendment sets aside fifty percent of the funds for fewer than three percent of the eligible properties; the remaining 950 plus eligible properties would compete for the other fifty percent less the Society's costs of administration. We join in the recommendation that the bill be changed to require that at least fifty percent of the amount awarded annually in grants must go for the preservation of eligible properties owned

ATTACHMENT 13
SWAM 4-24-90

by county and local governments, county and local historical societies, and private non-profit organizations. Those three categories total around two hundred buildings and would constitute about twenty percent of the eligible properties. It would seem reasonable to allow those types of public and semi-public properties enhanced opportunities for funding.

Our opinion has been sought on some other proposed changes to this legislation. We will be glad to offer our comments on those proposals at the appropriate time.

In the mid and late 1970s the Historic Preservation Department passed through federal historic preservation grants to owners of National Register properties. The experiences of administering those federal grants will be utilized to develop and administer this state program.

I want to briefly convey to you a sense of how we would determine which historic properties would receive assistance. An application and evaluation process would be developed to provide all eligible properties a fair opportunity to compete for grants. That may require that we establish categories with a specified amount of funding for each category within the framework established by the bill; examples of such categories might include private residences, rural properties, Kansas Main Street project area buildings, etc. The State Historic Sites Board of Review, a gubernatorially appointed body, would be used to evaluate project applications and recommend funding.

The evaluation criteria are spelled out in the bill and would include such factors as the historical significance of the property, the condition of the property, the urgency of preservation work proposed, and whether or not the building is endangered. We would consider issues of structural repair and enclosure such as roofing, painting, window repair, etc., more important than

interior decorative finishes. We think that property owners should be required to provide matching funds, perhaps a minimum of 10%, in order to demonstrate their commitment to the preservation of the property.

We are concerned that the public benefit be assured and that the recipients continue to maintain the buildings that are assisted with a grant, so some form of maintenance agreement or covenant running with the land would be a condition of every grant.

In late 1987 we sent out approximately 2,000 questionnaires across the state to all owners of historic properties, government administrators, and a great variety of individuals and organizations interested in historic preservation. This was done at the request of a Congressional committee assessing the national historic preservation needs. We received 166 replies of which 39 identified needs in the areas of survey, planning, nominations, education, etc., while 127 identified construction needs totaling more than \$27,000,000. The 64 questionnaires which were returned for listed properties represented less than seven per cent of the eligible properties. We attributed the relatively low rate of return to the public perception that there wouldn't be any federal money available anyhow--a perception that turned out to be accurate.

In conclusion, there is a significant need for assistance to historic buildings in Kansas which is not now being addressed by any state or federal program. This bill would be a good start in remedying that situation.

THE HISTORIC BUILT ENVIRONMENT
NEEDS YOUR SUPPORT FOR H.B. 2859

Following so closely on the heels of Earth Day, this hearing provides yet another forum to encourage strong action to save a precious part of the world around us--our historic built environment. By supporting H.B. 2859, you will empower the State of Kansas to create a trust fund that will help Kansans to preserve for future generations the most significant remaining examples of this special environmental heritage.

There is no doubt that such help is needed. During my three years as director of the Southeast Kansas Tourism Region, the question I heard more than any other was: "What grants are available for historic preservation projects?" The answer was that there has never been state funding available for brick-and-mortar preservation in Kansas.

Even before 1989 property tax statements went out, I personally knew of dozens of state and national register-quality buildings that were falling into disrepair because their owners simply did not have the money to restore, repair or renovate them. Now that property taxes have increased so sharply, these owners are demolishing their historic buildings because they can't afford to pay taxes on them, let alone to repair them.

Once these structures are lost, they cannot be replaced. They represent an at-risk environmental resource that must be protected, just as we protect the endangered natural resources that Kansans prize so highly.

I urge you to allow Kansas to follow the lead of the 32 other states that currently offer financial incentives for historic preservation. Please support H.B. 2859.

THE KANSAS SOCIETY OF ARCHITECTS, AIA

A Chapter of the American Institute of Architects
The Jayhawk Tower 700 Jackson, Suite 209 Topeka, KS 66603 913•357•5308

April 24, 1990

TO: Members of the Senate Ways & Means Committee
FROM: Trudy Aron, Executive Director
RE: **SUPPORT FOR HOUSE BILL 2859**

The Kansas Society of Architects supports House Bill 2859. We believe the establishment of a heritage trust fund is beneficial to the State for several reasons:

This legislation says Kansas values its architectural past and encourages its preservation

Assists owners in the continued preservation of those properties listed either on the National Register of Historic Places or the State Register of Historic Places

Will act as an incentive for owners to pursue historic designation for their properties

Tells potential buyers of historic properties that the State of Kansas is willing to assist owners of designated properties

It is especially exciting to be testifying on this issue in 1990 for this is the centennial year of the American Institute of Architects' Historic Resources Committee - AIA's oldest committee. The Kansas Society of Architects supports historic preservation as the process of conserving, for future generations, the significant elements of the built environment. Architecturally, this process extends beyond traditional restoration to include: identification, documentation, stabilization, reconstruction, rehabilitation, adaptive use, and maintenance.

We believe HB 2859 will enable more of our architectural heritage to be saved for those future generations with very modest costs to all property purchasers.

The Kansas Society of Architects urges your support of HB 2859.

ATTACHMENT 14-A
SWAM 4-24-90

Good afternoon, Mr. Chairman and members of the committee. I am Linda Fincham, Chairman of the Register of Deeds Legislative Committee.

The Register of Deeds Association would like to express a few concerns about H.B. 2859.

The Kansas Mortgage Registration Tax was implemented in 1925 as a tax on intangibles. Through the years, this tax has been passed on to the borrower.

We appreciate the need to fund the Historical buildings within the state; but we question the use of the mortgage registration tax revenue as a means, since this has always been put in the County General Fund. If this bill is implemented the result would be that the historical buildings would be funded only by a fraction of the Kansas taxpayers. Larger counties would be contributing excessive amounts as a result of corporative building and the smaller counties contribution would be resulting from construction mortgages, first time home buyers, the oil and gas industry and the Kansas farmer who is still struggling after a number of years of drought and low prices. Reviewing the Kansas economy, these Kansans are those who could least afford the increase in mortgage registration tax.

Our association is not at all against funding the Heritage Trust Fund, however we feel that it should be supported by those who have expressed the concern, or by a mill levy that would be spread across the tax rolls such a libraries and museums which would be supported by all taxpayers in the respective counties to support their needs.

It is a real concern to the Register of Deeds Association that if this bill becomes law, a precedent would be set whereby the mortgage registration tax would become a vehicle for collection by private interest groups. This tax has always been generated in the county and used for the county general fund, we strongly feel that all of this tax should be kept at the county level.

In summary, the Register of Deeds Association is opposed to H.B. 2859 and any further erosion of the county tax base.

If you have any questions, I have several members of my committee here with me today and we would be happy to answer your questions. Thank you for allowing us to express our concerns.

REMARKS OF REP. VERN WILLIAMS (R)-WICHITA

April 23, 1990

BEFORE SENATE WAYS AND MEANS COMMITTEE

As Proponent of HB 2719 -

Affinity Credit Cards for Governmental Employees

Mr. Chairman, members of the Committee. I appreciate the opportunity to appear before you in favor of HB 2719.

This is a simple bill with a positive fiscal note. It provides a benefit to all Kansas governmental employees with little or no administrative costs.

Originally limited to KPERS members, the bill was amended by the House Pensions and Benefits Committee to apply to all governmental employees in Kansas. It now will benefit also employees of the City of Wichita (who are not KPERS members) and employees of other local units of government who likewise are not KPERS participants. The House Appropriations Committee added retired government employees and restricted bidders to financial institutions located and doing business in Kansas.

Affinity Cards are those credit cards issued by financial institutions to persons with a common interest such as being a government employee. Benefits include being able to charge items or services purchased and for identification when lodging at hotels or motels who offer government rates. This can be a significant saving.

Last summer my wife and I stayed at the Days Inn in Oakland. The rate was \$87 for the night. When I asked if they had a "government rate" the room charge was quoted --\$43 for the night!

The program would be inaugurated by the Department of Administration. Secretary Smith favors the concept.

He would solicit bids of financial institutions and negotiate terms of participation and fees to be paid to the state. Mailings would be through normal channels (along with payroll checks or bulk to local units) at no cost to the state. Neither would any lists of employees be released. The successful bidder would pay all printing and distribution costs.

The Budget Department estimates a fee to the state general fund (there are more than 145,000 eligible employees) at \$350,000. While this may be on the high side, whatever is realized would be a painless method of adding funds to state coffers while, at the same time, providing a benefit to thousands of Kansas government employees and their families.

I will be happy to answer any questions.

TESTIMONY

Senate Ways and Means Committee

SENATE BILL NO. 770

April 5, 1990

Mr. Chairman and Members of the Committee:

I represent the Kansas Alcohol and Drug Addiction Counselors Association, the Kansas Association of Alcohol and Drug Program Directors and the Kansas Community Alcohol Safety Action Project Coordinators Association. These individuals and organizations crisscross our State to offer professional assistance for those persons who are afflicted with that fatal illness of alcoholism and drug addiction. We support Senate Bill No. 770 as another measure to raise needed funds for the alcohol and drug treatment field in the year when funds are not too readily available. This source of revenue comes from those people who fail to recognize the privileges of driving in the State of Kansas. In addition, 22,000 of these individuals each year, more or less thumb their nose to the Court and fail to appear for a Court hearing or pay a traffic fine.

It is time that these individuals who become our chronic law breaking citizens realize that driving a vehicle in the State of Kansas is a privilege. Once they understand the penalties which will hurt their pocketbooks are in place, it is hoped that they will adhere with our traffic laws in the State of Kansas.

The funds that this proposed legislation would raise would offset some loss of budget funds in House Bill No. 2618. The House in 2618, adjusted the shift of \$452,977 alcohol abuse portion of the block grant to the mental health block grant and towards mental health's reform. This committee restored \$163,420 of those funds. However, I am not sure where the remaining \$289,557 fits into the picture. In addition, House Bill No. 2618 changed the general assistance formula for the year of 1991. Under the present formula, those alcohol and drug addicted persons who are now receiving general assistance while under treatment for their disease would be exempt. This is estimated by the Commissioner on Alcohol and Drug Abuse Section as a loss of approximately \$500,000.

This very committee saw this as a primary concern in Senate Bill No. 413 and reinstated those general assistance grants for the balance of fiscal year 1990 in excess of \$132,000.

The Alcohol and Drug Abuse Services allocate their money by grant methods. If the money is not in their budget, they can not allocate any money. At the present time, the indigent and working poor of the State of Kansas must wait over 30 days for a bed in a community based alcohol treatment program. Some of those individuals must spend this time incarcerated at a cost to the local taxpayers. Then there are those individuals who give up on treatment and continue to drink and drug until they show up at our hospitals as a medical patient, costing this State thousands of more dollars.

ATTACHMENT 16
SWAM 4-24-90

It is our belief that even though this legislation will raise less than 3/4 of a million dollars, that any little bit will help in a year where funds are quite scarce. Again, the organizations that I represent totally support this bill as another measure in our fight against alcoholism and drug addiction.

Respectfully,

Gene Johnson

RE: Senate Bill No. S0770AVH

FISCAL IMPACT

1. LICENSE REINSTATEMENT FEE: Raising the examination fee for persons required to be retested due to a DUI conviction will result in an increase to the State Highway General Fund of approximately \$11,000.

The reinstatement fee of \$25.00 for these same people will produce revenue of approximately \$137,000 to be deposited to the Community Alcoholism and Intoxication Programs Fund.

The number of people required to take an examination pursuant to K.S.A. 8-241 averages over 5,000 per year.

2. FAIL TO COMPLY WITH A TRAFFIC CITATION REINSTATEMENT FEE: There are approximately 25,000 suspensions per year under K.S.A. 8-2110 which would produce revenue of \$625,000 to the Community Alcoholism and Intoxication Programs Fund. However, that statute requires a \$25.00 reinstatement fee for each charge. Many of the suspensions involve multiple charges although no actual count is available. A conservative estimate would be fifty percent which would add an additional \$312,500 to the fund and quite possibly more than that amount.

ADMINISTRATIVE IMPACT

It should be noted that if the number of DUI convictions and fail to appear suspensions are reduced as a result of these penalties, the estimated revenue would also be reduced but two worthwhile goals will have been achieved.
