In a surprise appearance, Governor Joan Finney announced she will present a property tax relief plan on Tuesday, January 22, at 11:30. Her proposal will call for a one-half billion dollar tax burden shift from property taxes to those currently not paying because of exemptions. It was her understanding that "by the turn of the century, no state will have sales tax exemptions."

A question was asked about the meaningfulness of the ratio on agricultural land since it is valued according to use rather than

fair market value. Mr. Swisher replied that the figure was rather meaningless; however, since the statutes require its calculation, it was provided. Some change probably would be warranted.

Committee members expressed concern about the recording of exempted personal property, the determination of unvalidated sales and the legality of county appraisers' determinations of invalid sales.

Bureau Chief Swisher stated that county appraisers are statutorily mandated to make those decisions. He said the Department of Revenue is responsible for auditing county appraisers in these situations and has done so "if ratio studies and the coefficient of determinations (COD), and medians look bad" or on behalf of requests from the legislature or county commissioners.

Bureau Chief Swisher finished by saying, "The information we have in the ratio study does give us some comparison to 1989. It is critical that these appraisers get this information validated, get it into the system so that they can set their own values and provide us any information for the sales ratio study.

It was moved by Rep. Joan Adam and seconded by Rep. Bruce Larkin that minutes of the previous meeting of the House Committee on Taxation be approved. The motion carried.

The chair announced that subcommittee assignments would be made on Friday.

The meeting was adjourned at 10:17 a.m.
