Liquor and Cigarette Tax Overview
House Taxation Committee
February 28, 2001

Chris W. Courtwright

Gallage taxes are imposed upon person who first manufacturers, uses, sells, stores, purchases or receives the alcolic liquor or cereal malt beverage. So someone has paid the tax by the time the product has reached the retail liquor store or in the case of CMB, grocery or convenience store. It's a cost, along with other taxes, including federal gallage and occupation taxes and various state and local license fees, which has been built in and is passed along relative to the retailer's acquisition cost.

Gallage tax rates are 18 cents per gallon for both CMB and strong beer; 30 cents per gallon for most wine, which is less than 14 percent alcohol; 75 cents per gallon for a special category of "fortified" wine which is more than 14 percent alcohol; and \$2.50 per gallon for alcohol and spirits. So when the liquor store owner purchases a case of wine, for example, from a distributor the 30 cents per gallon tax has already been built in as part of that store owner's acquisition cost.

All of the gallage taxes on beer and wine go to the SGF. 90 percent of the tax on alcohol and spirits goes to the SGF, while 10 percent goes to the CAIPF.

Enforcement Tax is an in-lieu-of sales tax imposed on the gross receipts of the sale of liquor to consumers and on the gross receipts from the sale of liquor and CMB to clubs, drinking establishments, and caterers by distributors. The enforcement tax rate is 8 percent. Someone purchasing a \$10 bottle of wine at a liquor store is going to pay 80 cents in enforcement tax, just as a club owner buying the case of wine we talked about a minute ago is going to pay the 8 percent tax.

CMB purchases in grocery or convenience stores are not subject to the enforcement tax, but rather are subject to state and local sales taxes. The highest combined state and local sales tax rate in effect on November 1, 2000 was 7.9 percent.

Besides the difference in the rates of the tax on sales of strong beer from liquor stores and CMB in grocery stores, there is of course a difference in the disposition of revenue. All of the 8 percent enforcement tax goes to the SGF. State sales taxes collected on CMB sales end up in the SGF, the SHF, the LAVTRF, and CCRSF. Local sales taxes collected on CMB sales of course end up back in the city and/or county where the transactions occurred.

Liquor Drink Tax is imposed on the gross receipts from the sale of alcoholic liquor by clubs, caterers, and drinking establishments. This tax is at the 10 percent rate, and the revenue is split up 25 percent to the SGF, 5 percent to the CAIPF, and 70 percent to the Local Alcoholic Liquor Fund (for ultimate return to the cities and counties where collected.)

So the purchase of a glass of wine in a club is subject to the Drink Tax. Also remember that when the club acquired the case of wine, it paid the enforcement tax. And before the liquor store acquired the same case of wine, the gallage tax had already been paid. House Taxation

Cigarette and tobacco products taxes

Stacking of taxes is also an issue when it comes to cigarettes and tobacco products.

The state cigarette tax is currently 24 cents per pack. Kansas has had a cigarette tax since 1927. In 1961 the Legislature made the explicit policy decision to also add the retail sales of cigarettes to state sales tax base. When local sales taxes were authorized by the Legislature in the early 1970s, those taxes by being married up to the state sales tax base also began being levied on cigarettes.

Tobacco products tax is imposed on non-cigarette tobacco products at the rate of 10 percent of the wholesale sales price at the initial time any distributor brings such products into the state for sale, manufacturers such products in the state for sale, or ships or transports them to retailers for sale.

So when the store over here in downtown at the back of Town Crier acquires the box of cigars, the tobacco products tax is paid or will have already been paid - similar to the liquor store's acquisition of the case of wine. When the consumer comes in to buy a cigar from that box, he pays state and local sales taxes, but the cost of the products tax will have effectively been passed on to him, too.

Regarding the disposition of revenue, all of cigarette and tobacco products tax revenues go to the SGF. An interesting piece of tax earmarking trivia is that from the 1930s through 1978, a portion of cigarette taxes was shared with cities and counties. That sharing was eliminated in 1979 when the County and City Revenue Sharing Fund - a demand transfer which involved earmarking of sales tax receipts - was created.
