

MINUTES OF THE SENATE COMMITTEE ON EDUCATION.

The meeting was called to order by Chairperson Dwayne Umbarger at 1:38 p.m. on January 29, 2002 in Room 123-S of the Capitol.

All members were present except: Senator Hensley (excused)

Committee staff present: Ben Barrett, Legislative Research
Carolyn Rampey, Legislative Research
Theresa Kiernan, Revisor of Statutes
Dale Dennis, Deputy Commissioner of Education
Judy Steinlicht, Secretary

Conferees appearing before the committee: Bill Frick, Shawnee Mission School District
Amy Brunner, KASB
Dale Dennis, Deputy Commissioner of Education

Others attending: See Attached List

SB394 – Authority of school boards to close school buildings

Senator Vratil offered a substitute bill to replace **SB394**. The substitute bill would repeal five statutes which provide a specific procedure for the Shawnee Mission School District to close schools. Shawnee Mission is the only school in the state with a student population of 1600 or more required to follow this elaborate procedure that was adopted in 1977. Senator Vratil's proposal is to repeal those statutes so that Shawnee Mission would be covered by the general school closing statutes applicable to all school districts in the state.

Bill Frick, Shawnee Mission School District, spoke as a proponent on **SB394**. Mr. Frick explained to the Committee the additional time and costs involved with the procedures they are now required to follow. (Attachment 1)

The Committee discussed having a formal hearing for the public prior to closing a school. It seemed to be the consensus of the Committee that a formal hearing should be held and in most cases this is done.

Amy Brunner, KASB, offered testimony as a proponent on **SB394**. KASB agrees that the current procedures required in Shawnee Mission inhibit the school board's ability to be efficient in managing the school buildings within its district. Many Legislators have called upon schools to be more efficient and this bill would allow Shawnee Mission to run their school district more efficiently. KASB also asked that the Committee introduce a second bill which would allow all school districts, including those with less than 1,600 enrollment, to close school buildings by a simple majority vote of the board. This bill would repeal the provisions under Kansas Statute 72-8213 requiring a resolution, public hearing, and protest petition. (Attachment 2) The Committee further discussed notifying communities when a school closing is being considered.

Senator Vratil made a Motion to amend SB394 with a Substitute Bill to repeal five statutes which provide a specific procedure for the Shawnee Mission School District to close schools. Seconded by Senator Emler. Motion carried.

Senator Vratil made a motion to pass favorably SB394 as amended. Seconded by Senator Emler. Motion carried.

Senator Vratil moved that the Senate Education Committee introduce a bill on school closings to eliminate the distinction between school districts above or below 1600 enrollment and provide that

CONTINUATION SHEET

MINUTES OF THE SENATE COMMITTEE ON EDUCATION at on January 29, 2002 in Room 123-S of the Capitol.

all school districts in the state can close a school upon finding that it is in the best interest of the district to close the school following a notice and public hearing on the question. They could close the school by majority vote of the board of education. Seconded by Senator Lee. Motion carried.

Dale Dennis distributed information to the Committee on income eligibility guidelines for free meals and reduced price meals. These guidelines are established by the U.S. Department of Agriculture. Dale explained the material to the Committee. (Attachment 3)

Meeting adjourned 2:30 p.m.

Senate Education Committee Testimony on Senate Bill No. 394
January 28, 2002
Bill Frick, Lobbyist, Shawnee Mission USD512

The Shawnee Mission School District is in support of Senate Bill No. 394. The school finance law provides a common base aid per pupil to all school districts in Kansas. As enrollment declines, the school district receives less money. It is essential that all districts have the same ability to cut costs in line with decreased revenue.

In order to close a school in Shawnee Mission, K.S.A. 72-8136 requires the district to go through an elaborate process that takes several months to complete. If a protest petition is filed an election is then held in the board member district where the school is located. If voters choose not to close the school, the board has no recourse but to keep the building open for another year and then go through the same process.

If we can't close schools we have no other recourse but to cut other programs across the district and increase class sizes.

The time required under the statute is also a problem. To illustrate the point, consider the recent announcement of potential state budget reductions to school districts. Since this information was not released until the December/January timeframe, the district could not close small elementary schools to make up the shortfall. The results won't be known until late spring while budget and staffing decisions need to be made in early spring.

Since the 1992-93 school year, the district elementary enrollment decreased 2,445 students. The district has thirteen elementary schools with enrollment less than 300 students. Last year, the district planned to close three elementary schools. Each of these schools filed a protest petition and a vote was taken for a total cost of \$31,268. Two of the schools closed with a savings of \$1.5 million, while a third remained open. The proposed savings of \$639,000 for the third school (Arrowhead) had to be replaced by other budget reductions that affected students across the district.

The Shawnee Mission School District believes this law should be replaced and urges you to support Senate Bill No. 394. With declining enrollment, the district needs the flexibility to close schools to remain efficient. The Shawnee Mission School District believes that it should be treated like all other large districts. Passage of Senate Bill 394 will assure that Shawnee Mission receives equal treatment.

An affirmative action equal opportunity employer

Testimony on
SB 394 – Closing School Buildings
Before the
Senate Committee on Education

By
Amy Brunner, Governmental Relations Specialist

January 29, 2002

Mr. Chairman, Members of the Committee:

Thank you for the opportunity to testify today on SB 394. The substitute bill introduced by Senator Vratil will repeal Kansas Statute 72-8136a-e, thereby allowing the Shawnee Mission school district to close school buildings by a simple majority vote of the school board. KASB is a proponent of this bill due to the efficiency and authority for local school boards that this bill promotes.

The procedures currently required for closing school buildings in Shawnee Mission inhibit the school board's ability to be efficient in managing the school buildings within its district. This law subjects the school board to a detailed process involving a resolution, public notice, public hearing, and a protest petition. SB 394 would only require two things. First, the school board must find that the building should be closed to improve the school system. Second, the school board must vote by a majority to close the building. Reducing the process required by law to close a school building to a simple majority vote of the board would allow the school board further authority to manage its district, a job that these board members were elected to do.

In light of the state budget situation, many legislators have called for schools to become more efficient. Reducing the school building closing process to a majority vote of the school board would give appropriate authority to the elected officials of the school boards and help them continue to be efficient.

KASB would urge the Committee to favorably recommend Senator Vratil's bill. Additionally, for the reasons just argued, KASB would ask the Committee to introduce a second bill which would allow all school districts, including those with less than 1,600 enrollment, to close school buildings by a simple majority vote of the board. This bill would repeal the provisions under Kansas Statute 72-8213 requiring a resolution, public hearing, and protest petition.

Thank you for your consideration.

Attachment 2

January 29, 2002

TO: Senate Education Committee

FROM: Dale M. Dennis, Deputy
Commissioner of Education

SUBJECT: At-Risk Definition--Reduced Price Meals

During a meeting of the Senate Education Committee last week, a request was made concerning the cost of including reduced price meals as part of the at-risk definition.

There are 43,873 students eligible for reduced price meals which would result in a cost to the state of \$16,978,851.

Feel free to contact my office if you have questions.

(Over for Guidelines for Determining Eligibility for Child Nutrition Program Benefits)

Guidelines for Determining Eligibility for Child Nutrition Program Benefits

Required Information for Households NOT Receiving Food Stamps, Temporary Assistance to Families (TAF) Payments or Food Distribution Program on Indian Reservation (FDPIR) Benefits

Four items of information must appear on the Application for Child Nutrition Program Benefits prior to determining eligibility:

1. Names of **ALL** household members must be listed in Part 3 of the application, even if the household member has no income.
2. Current **monthly** income received and identified by source by each household member
3. Signature of parent and/or guardian or adult household member
4. Social Security number of the adult household member signing the application

If **ANY** of the four required items have not been completed, the information **MUST** be obtained before an eligibility determination can be made. The application may be returned to the household or the household may be contacted by phone or in writing to get the information. If the application is missing the signature, the application **MUST** be returned to the household.

Required Information for Households Receiving Food Stamps, TAF or FDPIR Benefits

1. Name(s) of child(ren)
2. The Food Stamp, TAF, or FDPIR case number for each child.
3. Signature of an adult household member

Food Stamp case numbers and TAF case numbers consist of eight (8) digits. It is a computer-generated number beginning with 0 or 1. Reported numbers with more or less than eight digits are not valid numbers. Determining officials must contact the family or local SRS office to obtain the valid number or obtain income from families before an eligibility determination can be made. When adding any information to an application, always initial and date the addition and indicate who provided the information.

Applicants NOT Receiving Food Stamps, TAF or FDPIR Benefits

Applicants not receiving Food Stamps, TAF, or FDPIR benefits must report current monthly income by source and household member. **Current income** based on last month's income must be listed for each household member. The application instructions (printed on back of the application) indicate types of income that should and should not be reported. Persons with fluctuating income should follow the instructions printed on the back of the application. The USDA Food and Nutrition Service has approved using data from the most recent U.S. Individual Income Tax Return - Form 1040 to determine income from private business operations. Income tax information cannot be used to report salaries and wages. All household members, including children, must be listed in Part 3 of the application.

Other Information

The racial/ethnic identity of the child(ren) is requested on the application. If a household fails to provide this information, the eligibility determination cannot be delayed if all USDA required information is completed.

If a school official is aware of a child from a needy household that is unwilling to apply for free or reduced price Child Nutrition Program benefits, that school official may certify the student eligible based on household size and income information obtained from other sources. School officials must note the source of their information, complete and file an application, and make a decision on the student's eligibility. Social Security numbers need not be obtained. The household must be notified of the student's eligibility.

Determining Official Responsibilities

1. Review applications and make determinations of eligibility based on household size and income or receipt of Food Stamps, TAF payments, or FDPIR benefits. Under no circumstances should school personnel erase information provided by the family applying for benefits. School personnel should never use "white-out" to cover any information provided by families applying for benefits. If it is necessary to change information on an application, draw a single line through the incorrect information, initial and date the change, and document source of revised information.
2. Sign and date each application.
3. Notify each household of approval or denial of benefits. Families whose applications were denied must be notified in writing. A copy of the notification letter should be attached to the application and filed.

Verification Immediately Following Determination of Eligibility

Some Sponsors may wish to verify household income at the beginning of the school year. To ensure that verification occurs **after** the application has been approved, the following procedures are recommended:

1. Receive applications from households, review them, and make determinations of eligibility.
2. When households are notified of their eligibility determination, send the letter requesting income documentation. State the date by which information must be received.
3. Complete verification responsibilities. Households that do not meet Income Eligibility Guidelines or do not reply must be notified in writing that benefits will be changed or terminated.
4. Follow-up to ensure records are complete for all verified households.

For further information regarding verification and determination of eligibility, refer to Eligibility Guidance for School Meals Manual with video training package (USDA, 1991, FNS-274).
