MINUTES OF THE HOUSE GOVERNMENT EFFICIENCY AND TECHNOLOGY COMMITTEE

The meeting was called to order by Chairman Jim Morrison at 3:39 P.M. on February 8, 2007, in Room 526-S of the Capitol.

All members were present except Representatives Holland, Sloan, Wilk, and Tafanelli, all of whom were excused.

Committee staff present:
Mary Galligan, Kansas Legislative Research
Tatiana Lin, Kansas Legislative Research
Renae Jefferies, Office of Revisor of Statutes
Gary Deeter, Committee Assistant

Conferees appearing before the committee:
Bob Mackey, Director, Division of Accounts and Reports, Kansas Department of Administration
Tracy Smith, General Manager, Kansas.gov (Kansas Information Consortium)

Others attending:
See attached list.

The Chair announced that the Committee now has two taxpayer transparency bills to consider: **HB 2207** and **HB 2457**.

The chair resumed the hearing on **HB 2207** - the taxpayers transparency act.

Bob Mackey, Director, Division of Accounts and Reports, Kansas Department of Administration, reviewed concerns of the Division regarding the bill (Attachment 1).   He stated that STARS (Statewide Accounting and Reporting System) is inadequate to meet the reporting requirements of the bill, and the volume of accessible data envisioned by the bill could not be met in the mandated time frame.

Members discussed the impact of the bill with Mr. Mackey. Answering questions, he said creating the interfaces with STARS and the process of converting information into useable data would be costly. Martin Eckhardt, Manager, Central Accounting Services, replied to a question that if a request for information falls within the Open Records Act, the Division will search records to provide the requested data. He noted that his office keeps detailed transactions for 16 weeks, after which records are sent to storage.

Jeff Glendening, Vice President of Political Affairs, Kansas Chamber of Commerce, provided written testimony regarding the bill (Attachment 2).

Karl Peterjohn, a conferee from the previous day, commented that as technology explodes, agencies must move away from hierarchical structures toward decentralized, distributive systems.

CONTINUATION SHEET

MINUTES OF THE House Government Efficiency and Technology Committee at 3:30 P.M. on February 8, 2007, in Room 526-S of the Capitol.

The Chair introduced Tracy Smith, General Manager for the Kansas Information Consortium (KIC), which provides the state portal (Kansas.gov) for the Informational Network of Kansas, and DiAnna Wages, KIC Director of Creative Services, who fielded questions from the Committee. Ms. Smith said KIC, as the Kansas portal, hosts about 190 sites and provides links to those agencies that create their own websites. She stated that each agency develops its own website and that there are no uniform standards for agency websites. She said Kansas.gov offers restricted search capabilities through a limited contract with Google; she noted that the portal has no criteria for indexing, but does offer a variety of search techniques, although building a robust search engine would add complexity to the process. Ms. Smith provided Attachment 3 to illustrate the services of Kansas.gov.

In discussing search capabilities, a member cautioned about spending funds needlessly for expanded search capacity. Another member, expressing frustration about the non-intuitive search procedure of Kansas.gov, suggested the need for a simpler, centralized system.

Duncan Friend, a conferee from the previous day, responded to a question about the proposed statewide Financial Management System (FMS), saying FMS is designed to collect more information, but its scope does not include making data accessible to the public, since it is focused on internal state business.

Ms. Smith replied to another question, saying that with a powerful search engine and proper data preparation, it would be possible to type in a word or phrase and, with one click, get to the desired data; she added that such a capability would take extensive work and added resources. Ms. Wages said presently key-word search is limited.

A member commented that the difficulty and cost of building a comprehensive search engine and providing readily available data should not deter the Committee from moving toward that goal.

The Chair, referencing page 60 of the December 2006 issue of *Government Technology*, noted that Kansas government, which 6 years ago was ranked #1 in digital prowess, is currently ranked #19; he lamented that Kansas, which invented digital government, is now falling behind.

Another member stated that the responsibility of the Committee is to envision where the digital state should be in five years and begin moving toward that goal. Agreeing, another member suggested 2020 as a year from which to create a vision and work back in measurable steps to create a road map. Another member suggested developing a set of criteria by which to measure progress. Members discussed what span of information is needed. A member reminded the Committee that **HB 2207** (and a new bill referred to the Committee, **HB 2457**) focus primarily on easy access to budget information. The Chair agreed.

The meeting was adjourned at 4:48 p.m. The next meeting is scheduled for Monday, February 12, 2007.

Committee on Governmental Efficiency and Technology
House Bill 2207 – Taxpayer Transparency Act

Robert L. Mackey, Director
Division of Accounts and Reports
February 7, 2006

Good afternoon Mr. Chairman and members of the committee. I appreciate the opportunity to discuss with you House Bill 2207.

House Bill 2207 enacts new law cited as the Taxpayer Transparency Act, and amends K.S.A. 2006 Supplemental 75-5133. This act would require the Secretary of Administration to develop and operate a single, searchable website accessible by the public at no cost to the user.

For each expenditure, the Taxpayer Transparency Act would require the Department of Administration to populate the website with information including but not limited to the following:
- Name and principal location or residence of the entity or recipient, or both, of the funds;
- The amount of state funds expended;
- The type of transaction;
- The funding or expending agency;
- The budget program source;
- A descriptive purpose of the funding action or expenditure;
- Any other relevant information specified by the Secretary of Administration.

Further, HB 2207 would require such data for Fiscal Year (FY) 2007 and each fiscal year thereafter to be accessible on the single website no later than 30 days after the last day of the preceding fiscal year.

The Department of Revenue, the State Treasurer, or any other state agency would be required to provide to the Secretary of Administration such information necessary to comply with the Taxpayer Transparency Act.

Provisions of HB 2207 exclude from disclosure on the website information considered confidential by state or federal law.

Attachment 1
GE+T 2-8-07

The provisions of HB 2207 would amend K.S.A. 2006 Supp. 75-5133 requiring the Secretary of Revenue to disclose and provide to the Secretary of Administration the complete contents of the tax expenditure information or report prepared by the Department of Revenue or other such information necessary to comply with the Taxpayer Transparency Act.

We support the concept of creating a website available to taxpayers as stated in the bill. However there are issues to consider as you work on this bill.

Not all the data as defined in this bill is available. As an example, incomplete contract and no subcontract information is captured in the Statewide Accounting and Reporting System (STARS). Further, it is our understanding that contract information, where available in agency systems, is not captured across agencies statewide in a consistent uniform manner. It is also believed that agencies generally do not capture subcontract information.

However, STARS does not have the functionality to keep all data (produced by agencies), so agencies with needs beyond that functionality have developed separate systems and are broadly defined and range from simple spreadsheet or database applications to complex proprietary stand alone systems. Many of these would have to be accessed by agencies to build interfaces or electronic files to report the required information to STARS

Additionally, STARS would need major modifications to include many of the data elements required by House Bill 2207. Because of the limitations presented in STARS it would be difficult to make the necessary modifications needed to gather the data required in the timeframe proposed by this bill. Furthermore, if the modifications could be made to STARS they could only apply to new data going forward.

Modifying the STARS system would be expensive; however, no precise estimate is available at this time without an in-depth study being conducted to determine the nature, extent, and cost of the modifications that would be necessary to capture the data. One complication of this method, regardless of cost, is the timing required by the bill. HB 2207 specifies that FY 2007 would be the first year's data to be established on the website, except that FY 2007 would be at least three-fourths complete by the time this bill became effective. That would require considerable "backtracking" in the gathering of data, thereby increasing the cost and time to do so. A similar problem would occur for the long term as a result of the provision that requires the information to be posted within 30 days of the end of a fiscal year. The volume of data involved each year would make it difficult to meet this time frame.

In 2006, The Department of Administration partnered with a consulting firm to conduct a Financial Management System (FMS) Needs Assessment study for the state of Kansas. Web access to data for citizens as outlined in this bill was not in the scope of the requirements defined and costs estimated as part of the recent needs assessment, but it is possible some functionality could be added with additional cost. For that cost to be

1-2

determined additional definition of the requirements and study would be required.

Again, thank you for allowing me to appear before you today regarding House Bill 2207. I welcome the opportunity to respond to any questions you may have.

Thank you Mr. Chairman, and members of the committee for this opportunity to testify in opposition to a portion of HB2207. My name is Jeff Glendening, and I am representing the over 10,000 member businesses of The Kansas Chamber.

While we do not oppose the entirety of the measure, we do take issue with the portion of the bill that would dissolve confidentiality of businesses receiving tax credits from the state. (Page 1; Lines 31-36)

Allowing a public list to be published annually would harm a Kansas company's competitive advantage. If a certain company is claiming a certain monetary amount in research and development tax credits, it sends a signal to their competitors they are working on a new product. This information should remain confidential so Kansas companies are not disadvantaged.

Tax credits are developed to increase investment in new equipment in jobs that will expand the Kansas economy and its tax base. If a company is claiming a tax credit, they are taking an active role in enhancing the Kansas economy.

It is also important to note that The Kansas Department of Revenue has broad authority to audit companies to ensure that all taxes are being paid are accurate and the tax credits claimed are correct.

These proposals would make Kansas an exception among the 50 states; we would not want to be one of the few states that expose confidential taxpayer information to public disclosure.

Thank you for the opportunity to express our concerns of exposing the confidentiality of Kansas businesses.

The Kansas Chamber, with headquarters in Topeka, is the statewide business advocacy group moving Kansas towards becoming the best state in America to do business. The Kansas Chamber and its affiliate organization, The Kansas Chamber Federation, have more than 10,000 member businesses, including local and regional chambers of commerce and trade organizations. The Chamber represents small, medium and large employers all across Kansas.
