Subject:	In opposition to HB2518

Hello,

I am submitting in written testimony as an OPPONET of HB 2518. We should not use ballot boxes all over Johnson County. In front of the Election Office with a camera is fine and a copy of the person's driver's license must go in the box like a bank card or a credit card. Or even a Library Card connected to our I.D. The ballot is then linked to that card for drop off.

However, I suggest that ballots be dropped at Red BOX's. Insert a bank card, credit card or D.L. a video of the person is available at RED BOX. A picture of the mail in ballot with a QR code that rings on the person's phone while they drop it off. Once, it arrives at the facility to be counted. A second ring from the QR code to their phone will ring. There is an electronic record and a piece of paper that spits out for the person. If there ever is an audit. Data people can figure out how a person's text get's a ding and they respond with forward of their received text with QR code to the audit. I am just suggesting. Paper record, electronic, video that the person has access too and can keep in their records, and an audit need be. Can be used to keep voter records clean. If George Jones is dead, and a ballot is mailed to him and returned to the office. Whoops it should clean it up. If George Jones cannot get to a Red Box, not dead yet. That is where you have notarized ballots for a shut in. So on and so forth. You do not make laws to the least in the population. They are exceptions.

Also, Jovan is pointing out something that goes to this problem with lots of extra ballots. It's only a few minutes.

I am opponent to the way drop boxes are done now. I feel there is a way to make dropping a ballot more efficient. Because we the Sheriff's office has a money counting machine. Counts, files a report, etc. All in front of you in like 1 second per bill. If a money counting machines can do that and put the bills in sequential order. What gives? This is why illegal immigration is happening and the Census is screwed up. https://rumble.com/v4b5b6c-the-u.s.-census-bureau-admitted-the-recent-census-miscounted-the-population.html Additionally, you have CISA helping with our Court room data break. They are the fox in the Hen house https://ept.ms/MailInFraudCensorsFM
