

This is for SB 366

January 22, 2024

My name is Vicki Kline, and I am the co-founder of Liberty Lions League and have been highly active in voter integrity issues. I am also a Precinct leader and my husband, and I walk our Precinct. In fact, we had a pickleball court possibly going in by five investors and we had an open discussion with all the neighbors a month ago. We had the opportunity to hear people's views about the neighborhood with Democrats and Republicans about the Pickleball court. I have about 77 people in our Precinct. When we walked last year before the election. I had three of my people, that I was able to talk with, give me a response to sending out the advance ballot applications.

They were not happy that these were sent out.

1. The money of 67,000 in Johnson County made them irritated.
2. Our neighborhood App, we are sharing from our RING cameras with each other that more people boldly are coming to people's cars to see if they are locked, taking Amazon packages, and looking in their mailbox. They felt having the ballot in their mailbox could have been taken and someone change their address or use their name.
3. I personally find it annoying that we cannot clean up our Voter Rolls for Kansas because we have a law that says as long as we stay engaged with the people on the voter rolls. You cannot remove them. It does not matter if they respond to us. They could be dead, and someone throws away the application. Our engagement with the address means they are staying on the voter rolls. We just paid to hear about how dirty our voter rolls were. Knowing this keeps them dirty is very irritating. And I will let my people know whose voting for stuff to keep them on it, because of money spent for advance voting applications. Here is the video from the people who did the advance voting work for Kansas.

4. Also, I went to have Johnson County Fred Sherman, head of our Election Office. He walked us through the machines a few days before the elections. This is standard and I video taped most of it. We did ask some questions and Fred basically said that he does not know if they are being hacked or if anything bad is happening. It is his job to do things administratively correct. He doesn't have to stop things that we do not like, for example above about the voter rolls. Unless it's a law. Please make it a law.

Thank you for your consideration and all you do for the State of Kansas

Vicki Kline
