

Senate Committee on Public Health & Welfare
SB219
Proponent Testimony
02/16/2023

Dear committee members of the Senate Health & Welfare Committee,

I would urge you to support SB219. I feel people need to take responsibility for their actions. Taxpayer funding should not be supporting one's personal bad choice, especially taking the life of a human being. According to hli.org, 96.5% of all abortions are for personal reasons, not for the health or well-being of the mother. Whether the taxpayer funding is used directly or indirectly in the abortion, that does not matter, it still should not be used for it. I strongly urge the committee to adopt SB219.

Respectfully,

Brett Anderson
