HB2106
Proponent

Chairman Proctor and Member of the House Elections Committee,

I am submitting my proponent testimony for HB2106

I do support this bill for the simple fact that Kansans not foreign entities need to make decisions about amending our state's constitution. While federal law already prohibits foreign contributions to candidates, it does not explicitly cover state constitutional amendment campaigns

HB2106 will fix that.

Foreign governments and businesses should not be able to fund efforts to change our state's founding document.

Regardless of political beliefs, all Kansans should agree that our state constitution should be shaped only by those you reside here.

Thank-you
