Dear Members of the Senate Taxation Committee,

I would like to extend my gratitude for granting me the opportunity to testify before your committee regarding the proposed elimination of sales tax on essential business operational items such as bowling equipment, pinsetter parts, janitorial supplies, and arcade parts.

Your willingness to consider this legislation is greatly appreciated and reflects a deep understanding of the challenges faced by businesses like mine. The removal of these taxes would significantly reduce our operational costs, which in turn could be reinvested into our business to enhance services, improve facilities, and potentially create more jobs within our community.

Thank you once again for your time, your attention, and most importantly, for considering the needs of small businesses in your legislative decisions. I look forward to a favorable outcome and remain hopeful for the future of our industry with your support.

Sincerely,

Kelly Hill
