

To the Chairman and members of the Senate Federal and State Affairs Committee,

Since the last Hearing on Convention of States in 2023, 7 new National Heritage Areas have been created.

Nine new National Trails have been created.

Two new National Monuments were created.

12.5 million acres of public lands were locked away from the public for preservation.

44,4 million acres of private property was locked away from future landowners in various conservation schemes.

100 million acres were targeted in a Department of Energy Corridor.

Since the last Hearing on Convention of States in 2023, I joined an organization fighting back eminent domain for CO2 capture programs. I aided in fighting back the EPAs attempt to require all meat packing plants to upgrade or install wastewater treatment plants that compared to municipalities.

I met with hundreds of people very concerned about federal initiatives to covet land and water.

I am just a citizen working with concerned people who only have moments to spare. We cannot hold back the federal bureaucracy without you. Please hear us, and help us protect our property and our agriculture economy.

Please join with other states and pass the application for a Convention of States.

Sincerely,

Angel Cushing
Allen, KS 66833
