Statistics Request Overall Description

On January 30, 2025, Case Management Statistics received a request for a statewide aggregate report of cases filed with the case type of CV Eminent Domain during FY20 – FY24.

The Odyssey Case Management System for the Kansas District Courts was queried for these statistics on January 30, 2025. An existing ECR was used to query the database.

Statistical Report Tables

Table 1 provides counts of CV Eminent Domain case filings by fiscal year.

Statistical Analysis Considerations:

- These statistics represent a snapshot in time as of the date the data was queried (01/30/2025).
- Included in the case filing counts are original filings and reinstatements. An individual case may be counted twice if it was filed and reinstated within the date range in question.
- These case filing counts do NOT include Eminent Domain appeals, which get filed under the case type CV Other Civil Appeal.
