

**CONFERENCE COMMITTEE REPORT BRIEF
SENATE BILL NO. 430**

As Agreed to April 10, 2026

Brief*

SB 430 would include mitragynine, the primary psychoactive component of kratom, on Schedule I of the Uniform Controlled Substances Act (CSA). [Note: Mitragynine was inadvertently excluded from the enrolled version of HB 2365, which was signed by the Governor on April 10, 2026.]

The bill would also reconcile amendments to specific statutes regarding theft and expungement that were amended more than once during the current and prior legislative sessions. For such statutes, the bill would repeal one version and, if necessary, amend the continuing version with noncontradictory amendments, creating a single version of the statute containing all amendments.

Conference Committee Action

The Conference Committee agreed to remove the contents of SB 430 and insert the provisions of HB 2365, including mitragynine in Schedule I of the CSA as intended, and to reconcile amendments to two Kansas Criminal Code statutes: KSA 21-5801, regarding theft, and KS 21-6614, regarding expungement.

Background

On April 10, 2026, the Conference Committee removed the contents of SB 430, regarding licensed physical therapists performing certain capillary blood tests, and inserted the corrected contents of HB 2365 and provisions to reconcile statutory conflicts. [Note: The contents of SB 430 were included in HB 2509, which was approved by the Governor on April 9, 2026.]

Fiscal Information

No fiscal note was available when the Conference Committee took action on the bill.

Controlled substances; Uniform Controlled Substances Act; kratom; mitragynine; reconcile; reconciliation bill; statutes; theft; expungement
