

**Testimony before House Insurance Committee
House Bill 2764- Coverage for Autism Spectrum Disorder
Presented by Eric Stafford, Senior Director of Government Affairs**

Monday, March 12, 2012

Mister Chairman and members of the committee:

We appreciate the opportunity to provide written testimony in opposition to HB 2367 which mandates the coverage for the autism spectrum disorder.

Studies have and continue to show that mandates increase the cost of health care and coverage. An unfortunate consequence of additional mandates and higher costs is a higher number of uninsured citizens. Controlling health care costs was the second most important factor to profitability for businesses across the state in our most recent annual CEO poll.

In order to remain competitive, businesses of all sizes have chosen to provide health care coverage. Unfortunately with the Affordable Care Act, that choice is gone and premiums are rising in anticipation of the implementation of the law.

The cost for many has reached the tipping point where it is too expensive to maintain health insurance as a benefit and the trend continues that fewer employers are providing coverage for their employees, leaving more employees to find their own insurance through the individual market. HB 2764 will only exacerbate this problem through higher premiums for all.

Our organization would encourage an optional market-driven approach for individuals seeking to purchase insurance policies which cover autism coverage where insurance companies decide whether or not to offer such policies based on the market need, not a government mandate.

Thank you for the opportunity to speak in opposition to HB 2764.
