BILL OTTO

Jan 31, 2012

The goal in this bill is simple. That no city should have two petition drives and three elections to change their form of government. Once to people have gone through the effort of a petition drive then have an election and the election confirms the will of the people, there should be NO changes until that new government takes office. The reason for home rule is to support the will of the local people to govern themselves, not to be used for a small group to hold onto power.

A handwritten signature in black ink that reads "Bill Otto". The signature is written in a cursive style and is positioned above a horizontal line that extends to the right.
