

To the State of Kansas

January 26, 2012

Each state needs to pass any bill that pertains to Bullying , harassment or cyberbullying. People already have to deal with stress either in school or with society that they do not need bullying in their lives. My oldest daughter was being harassed in middle school about 9 years ago , and I went to the School and was told they can not do anything until they see the harassment, (like that s going to happen). I took matters into my hand and went to the parents of the two that started the harassing. City, state and federal government needs to step in to help kids while in school, the parents can not be there 24-7. I am not asking for babysitting, but to have somewhere the kids can go to for help. In the case with Rianna she had no one to turn to, so she ended her life. Life is precious to lose especially for kids. Please consider Senate Bill No. 278 and make it into law, so that other states will follow. We the people need to take a stand and protect our kids and adults for that matter when it comes to bullying.

Thank you

Richard Sifuentes
