

Disposition of Military Decedent's Remains

HB 2060 adds a new provision that, under certain defined conditions, would supercede the existing statutory listing of priorities that control the final disposition of a military decedent's remains. The provision applies to all active duty military personnel and gives priority to the federal Department of Defense Form 93 in controlling the disposition of the decedent's remains for periods when members of the U.S. armed forces, reserve forces, or national guard are on active duty.
