

SESSION OF 2012

**SUPPLEMENTAL NOTE ON HOUSE BILL NO. 2458**

As Recommended by House Committee on  
Transportation

**Brief\***

HB 2458 would amend the weight limitation for certain trucks – trucks specifically designed, equipped, and used exclusively for garbage, refuse, or solid waste disposal when loaded with garbage, refuse, or waste, and trucks (that are not truck tractors) mounted with a fertilizer spreader – to 60,000 pounds for trucks with three axles and to 40,000 pounds for trucks with two axles, regardless of spacing between axles.

**Background**

The bill was requested by a representative of the National Solid Wastes Management Association, who also testified in support of the bill. Proponent testimony also was received from the president of a private hauling company. No opponent testimony was presented.

Under general gross weight limits, a two-axle vehicle has a weight limit of 34,000 pounds to 40,000 pounds and a three-axle vehicle has a weight limit of 34,000 to 60,000 pounds, depending on the axle distances.

According to the fiscal note prepared by the Division of the Budget, the bill would have no fiscal effect on the state budget.
