

## HOUSE BILL No. 2636

By Committee on Energy and Environment

2-11

---

1 AN ACT concerning the secretary of health and environment relating to air  
2 quality standards.

3

4 *Be it enacted by the Legislature of the State of Kansas:*

5 Section 1. (a) For all coal-fired and natural gas electric generating  
6 units that are affected units pursuant to section 111(d) of 42 U.S.C. § 7411,  
7 as in effect on the effective date of this act, that have been constructed or  
8 have received a prevention of significant deterioration permit by July 1,  
9 2014, the secretary of health and environment shall establish separate  
10 standards of performance for carbon dioxide emissions based upon: (1)  
11 The best system of emission reduction that has been adequately  
12 demonstrated while considering the cost of achieving such reduction;

13 (2) reductions in emissions of carbon dioxide that can reasonably be  
14 achieved through measures taken at each electric generating unit; and

15 (3) efficiency and other measures that can be undertaken at each  
16 electric generating unit to reduce carbon dioxide emissions without any  
17 requirements for fuel switching, co-firing with other fuels or limiting the  
18 utilization of the unit.

19 (b) In establishing any standard of performance for any existing  
20 electric generating unit pursuant to this section, the secretary may consider  
21 alternative standards and metrics or may provide alternative compliance  
22 schedules than those provided by federal rules or regulations by  
23 evaluating: (1) Unreasonable costs of achieving an emission limitation due  
24 to plant age, location or the design of an electric generating unit;

25 (2) any unusual physical or compliance schedule difficulties or  
26 impossibility of implementing emission reduction measures;

27 (3) the cost of applying the performance standard to an electric  
28 generating unit;

29 (4) the remaining useful life of an electric generating unit;

30 (5) any economic or electric transmission and distribution impacts  
31 resulting from closing the electric generating unit if compliance with the  
32 performance standard is not possible; and

33 (6) the potential for a standard of performance relating to unit  
34 efficiency, including any requirements for a new source review or the  
35 application of a best available control technology emission limitation for  
36 any criteria pollutant as a condition of receiving a permit or authorization

1 for the project.

2 (c) The secretary may implement such standards through flexible  
3 regulatory mechanisms, including the averaging of emissions, emissions  
4 trading or other alternative implementation measures that the secretary  
5 determines to be in the interest of Kansas. The secretary may enter into  
6 voluntary agreements with utilities that operate fossil-fuel based electric  
7 generating units within Kansas to implement these carbon dioxide  
8 emission standards. Such agreements may aggregate the carbon dioxide  
9 emissions levels from electric resources in this state, including coal,  
10 petroleum, natural gas or renewable energy resources as defined in K.S.A.  
11 66-1257, and amendments thereto, that are owned, operated or utilized by  
12 power purchase agreements by utilities for purposes of determining  
13 compliance with such carbon dioxide emission standards.

14 Sec. 2. This act shall take effect and be in force from and after its  
15 publication in the statute book.
