

Motorcycle Headlamps and Side Lights; HB 2318

HB 2318 allows a motorcycle's headlamp to be wired with a headlamp modulation system, which must meet federal standards. The bill also allows certain types of lights on the sides of motorcycles. The bill requires those lights to be visible only from the side and not from the front or rear and to not protrude beyond or outside the body or wheel of the motorcycle. The side lights may emit white, amber, or red light without glare.
