

Hi my name is Jerri lee. honestly no i have not finished the program yet but while i was taking the courses it was a blast and i hope to finish the courses i need, having a learning program like NDLA is very important, with me being a mother and works fulltime so it was very hard to find the time to do the courses and here about fall time would be a wonderful to finish what i started. And if the program is taken from us who need the help with math or science, etc.... how are we actually learning and throwing us to the sharks isnt the answer some of us have need the help. have a good day.

sincerely ,
Mrs. Herzog
