

I am writing to ask that you pass legislation to strengthen data privacy in Kansas and that you oppose HB 2099. We need to retain parent's rights with regard to their children.

There is already too much data collected about our children. Data is already difficult to protect, but it is such an over-reach to collect the volumes of data in the first place. Our families have a right to privacy and I expect the State of Kansas to support that right at every turn.

Please do everything you can to protect our children's data, the sanctity of the family, and oppose HB 2099. It would only serve to undermine the role of the parent in the family.

Sincerely,
Duane Tasset
