

Members of the House Education Committee:

I am asking the committee members to pass HB2262 that increases privacy protection for students' and families' information, moving it out of committee for farther legislation action.

A couple of questions related the **Kansas Communities That Care survey** (KCTCS) and other surveys related to the collection of students' and families.

a) What is the total cost of these surveys?

b) Does the grant money received exceed cost of surveys?

I would a clear reply to these questions, thanks.

Even if returns exceed cost I would still question these type of intrusive, divisive surveys like KCTCS.

School learning hours should not be used for survey; if a survey is truly needed, it should be done at home.

Looking forward to the HEC increasing privacy protection for student and family information.

Sincerely

Darrel Wilson
