

To Honorable Ron Highland, Chair of the Education Committee,

Please Vote No on Bill HB 2262. Our children do not need data collected on them. This is an invasion of privacy and government has no right or reason for this information. Just another form of the money grab. My children have taken some of these ridiculous surveys and teenagers have even questioned the reasoning behind these surveys. Please respect our privacy and the privacy of future generations.

Sincerely,

Rachelle Routh
