

Telecommunications and Network Technology Program

Program Overview

The Telecommunications and Network Technology Program provides the technical knowledge and skills needed for a career in the communications and network technology industry. Students receive training in all aspects of telecommunications including circuits, devices and cabling, digital logic, wireless communication, fiber-optics theory and Voice Over Internet Protocol (VoIP). In addition, students analyze computer data networks, LAN/WAN design and Class 5 central office applications. Upon successful completion of the two-year program, students are awarded an Associate of Applied Science Degree.

Program Outcomes

- Demonstrate a strong understanding of computer networking concepts.
- Demonstrate knowledge of telecommunications and network hazards and related safety practices.
- Use effective communication skills appropriate to the telecommunication field.
- Demonstrate a strong understanding of digital switching infrastructure and networking.
- Demonstrate the ability to install and manage communication copper cabling infrastructure.
- Demonstrate the ability to install and manage fiber optic cabling infrastructure.

Post Graduate Jobs

Job Title	Annual Salary
VoIP Design Engineer	\$60,000
Communications Technician	\$40,000
Network Administrator	\$50,000
Outside Plant Technician	\$36,000
Network Provisioning Engineer	\$34,000
