RE: Letter of Recommendation for Continued Use of Lexia Core 5

TO: Kansas Legislature and State finance officials

This is a letter to express my appreciation for the Lexia Core 5 Program and my continued support for it to be utilized at Pleasanton Schools.

This is my fourth year as principal and third year of using Lexia at Pleasanton Elementary School and I am extremely impressed with the Lexia Core 5 reading program. I have had the pleasure of watching our students learn to read and most importantly, being able to track their progress along the way.

Here are the reasons I feel using Lexia in our schools is a benefit for USD#344:

- Unlimited resources for specific reading skill sets for students and teachers
- Program is user friendly for students and teachers
- Based on individual student growth and measures DAILY progress
- Ease of reading data and student reports
- Allows students to assess their own work and set goals
- Now available for PreK—helping with Kindergarten readiness!

Again, Lexia has pushed Pleasanton to being a data driven district and I cannot imagine our progress without it. I will be happy to visit with any representatives to show my support for the program.

Sincerely,

Raymond L Streeter II
