SB 105 Child Support

Testimony in Opposition of this bill

Mr. Chairman and Committee Members,

The supplemental notes read, "Congress has passed legislation mandating these changes be adopted by the states, and failure to do so verbatim may result in the loss of IV-D child support federal funding and the Temporary Assistance for Needy Families (TANF) block grant."

What are trying to achieve? Is this really about receiving the Federal monies? Is this about compliance to the Federal Government?

I would note. Not one legislator has EVER VOTED on the Child Support Guidelines since 1987. The legislature has never vetted the Guidelines publicly, yet they are imposed against your constituents without reproach. The public is all but shutout of the process. We have lawyers and judges serving decades on the same advisory council (how are we going to address issues with these type of ideologues being in place for decades)? They are not serious about improving the formula – FACT!!

I think the STATE deserves better! The problem lies between the walls of the Capital. We need to change statutes to protect taxpayers and provide state accountability. Not federal handouts.

We can do this together

Respectfully Submitted,

Christopher K. Brown
