

Kathryn — (placing parent)

I Found out About Safe Families when I was Residing At the Rescue Mission just year & My Advocate Sherise Had Told Me About Safe Families for children & Asked me if I would want there Help & Services. At First I was very Hesitant & Skeptical Because I didn't know anything about Safe families for children & I didn't know the people At All & AS A Mother I'm very protective over my kids & don't just let my kids go with anyone. But Once I Met Mrs. Sue Smith & talked with her & talked with the Safe family & met them I felt very comfortable with them & the program. I needed A safe family to care for my oldest daughter while I was giving birth to my youngest daughter I had absolutely no one to watch her while I was in labor so that's where safe families stepped in and saved the day the first time the second time was shortly after I gave birth I was needing someone to watch my kids while I go out looking for jobs & putting in applications & having job interviews & getting ready to move into my ~~new~~ ^{own} house. So much has changed for me since I have had the help from safe families. I got a full time job working in home health and moved into my new home. Safe families helped me get furniture & supplies for my house. the relationship between the safe families is wonderful we will never be much the same

have a bond with them & they
are my friends now & I just can't
thank them enough for all they have
done for my kids and I.
