

The number of persons who fall through the cracks without the Medicaid expansion is disheartening.

One example: This lady is a naturalized citizen who worked for a little over two years in this country before receiving a traumatic brain injury in a car wreck. She has limited use of her left side. She has made it thus far because of her husband's health insurance with his job. He has seen fit to go off with another woman. This leaves her without coverage because she receives a little less than \$200 each month from the insurance company.

For her sake and that of so many other families and persons, please vote for the Medicaid Expansion NOW!
