

Jan. 14, 2015

To the Chairman and Members of the Local Government Committee,

I would like to urge you to forward this bill HB 2003 out of committee.

Island Annexation in it's current form needs to be modified. We in our community are being infringed upon by a city that is using Island Annexation to cause our community great harm. This city is using Island Annexation to put an unwanted landfill in the middle of our community. This proposed landfill would degrade property values, cause health problems, possibly contaminate ground water, possibly contaminate surface and runoff water and various other problems. This community stands in opposition to this Annexation!

Please forward HB 2003 out of committee and into law.

Sincerely,

Richard Swaim, Jr.
Riverton, Ks.
