WAR Retirement Data

Who is included in this report?

- All retirees reported to the actuary for the 12/31/2013 actuarial valuation
- KPERS Members (Judges and KP&F are excluded)
- Only members (Joint Annuitants, Survivors, Beneficiaries, etc. are excluded)
- Normal Retirements (Early retirements, disability, etc. are excluded)
- Working After Retirement participants since 2009, when the special exemption for licensed school personnel was implemented
 - If a retiree returned to work in more than one year, they were only counted once and classified in the position from the most recent year
- This information should be considered a best estimate as the data is unaudited

WAR Retirement Data

KPERS School

- Retirees returning to work for a KPERS School employer retire, on average, 3.3 years earlier than the average retiree who does not return to work

Normal Retirements - KPER Group

WAR Retirement Data

All KPERS Retirees

- The number of KPERS retirees returning to work is small relative to the entire KPERS retiree population
- However, the younger average age of retirement among working after retirement participants does move the distribution of age at retirement for the entire KPERS retiree population slightly younger
- To the extent that actual retirement experience differs from actuarial assumptions there will be a cost to the System
- Even with this additional information, it is not possible to accurately calculate a contribution rate that would cover the cost to the System
