To members of both houses,

I would ask you to please consider passing a bill to allow Kansans to purchase license plates (for their vehicles) supporting the fight against Alzheimer's. This horrible disease, as you know, has affected so many individuals and their families. It's one of the most horrible diseases of all in that it strips the individual of a lifetime of memories. One's whole life no longer can be cherished as once the disease takes hold, all memories are lost.

Coach Bill Freeman, who won battles against heart disease and cancer during his 80-plus years on earth, can't win this battle because there is absolutely no cure.

In his honor, and honor of my grandfather who had Alzheimer's, and all the people currently suffering from Alzheimer's I hope you allow the Alzheimer's license plates. If one person donates for a cure it's worth it.

Let's all hope and pray this disease can be cured. It has broken the hearts of so many people in our great state and country.

Bless you all for passing this bill. Let's stop Alzheimer's!
