Dear Kansas State Legislature,

Alzheimer's is a terrible disease. I lost my grandmother, my wife's grandmother, and now my high school football and track coach to this awful disease. I would like to request that you pass the bill to allow Kansans to purchase license plates supporting the battle against Alzheimer's. Every little bit of money will help in research to put an end to this illness which is so painful for families and loved ones to see.

Sincerely,

Scott C. Stidham
