

To whom it may concern,

Alzheimer's hits so close to home for so many of us. It knows no bounds and strikes persons from every walk of life. From my Kansas Hall of Fame High School Coach at Lawrence High, Bill Freeman, to my great uncle, Wayne Harvey, a Kansas native and former dean of the dental school at the University of Denver, I have seen the challenges faced by those battling this disease. Raising awareness is an important step toward research and development of future treatments. The State of Kansas can take a significant step in raising this awareness by creating Alzheimer's license plates. This action can have far reaching effects in the battle against Alzheimer's disease. I fully support and encourage the state legislature to take action.

Thank you for your time and consideration on this matter.

Sincerely,

A handwritten signature in black ink, appearing to read "Thomas W. Williams". The signature is fluid and cursive, with a prominent initial "T" and a long, sweeping underline.

Thomas W. Williams
