H.B. 2436
"Trike licensing" Bill

Testimony of Sarah Anderson

I want to express my support for H.B. 2436. As I understand the issue, this bill would allow people that have some problems such as dexterity issues, weight limitations, physical handicaps, their freedom to be independent. As a nurse I understand that mental health can be just as important as physical. To allow some one to ride and come and go, does more for their mental health that any medication could do. I believe they need to be able to pass a "trike" test before license but to make a distinction between two and three wheeled motorcycles could and I believe would make a whole new set of individuals enjoy something in life they may never of had a chance to do.
