

### PROSPECTUS SAMPLE

## **Bachelor of Science, Accounting**

## **Program Description**

In this program, you will prepare to work in a variety of fields upon graduation including industry, nonprofit, government, higher education or public accounting. Additionally, you can supplement your major with a concentration giving you specialized training in an area of interest making you more competitive in the job market.

The accounting major requires a total of 120 credit hours, including general education classes, which meet the requirements of the K-State 8 and additional courses including MATH 115, PSYC 104 and a natural science with lab. You will also take 20 credit hours in foundation business classes and 18 credit hours of core business classes. For your accounting major you will take 19 additional hours of accounting classes as well as six credit hours of any business course No. 320 or higher. Your career in the business school will culminate in a capstone course, Business Policy & Strategy (MGMT 498), where you will apply the skills you acquire in the business school toward case studies and projects.

#### **Professional Career Examples**
