

Domesticated Deer; SB 46

SB 46 updates law regarding identification of domesticated cervids (a term meaning all members of the deer family, including elk, moose, and all species of deer) by requiring each animal entering or leaving a premises, either alive or dead, to have official identification, as identified in rules and regulations of the Animal Health Commissioner of the Department of Agriculture. Official identification is not required if the domesticated cervid is moved to a licensed or registered slaughter facility in Kansas.
