

Dear Chairman John Barker and the members of the House Committee on Federal and State Affairs:

I OPPOSE House Bill HB2220.

I'm typing this as my 4 year old son sleeps who will likely follow the 3 generations of my family who have attended Kansas Universities. These institutions have provided a handgun free learning environment where 2 federal attorneys, a board certified hematologist oncologist a social worker, a college educator, 2 elementary teachers, an accountant and a successful entrepreneur were educated without fear that the person next to them had a gun. If you choose to allow hand guns on the campuses of Kansas universities they will no longer be a safe place for our children to learn and become the educated adults Kansas so desperately needs.

College can be a difficult time while children are learning manage many responsibilities. Carrying a hand gun has proven to be a very difficult one as demonstrated by Boner Springs, Kanas Representative Willie Dove when he lost a loaded .380 handgun for 2 days that he had left in a desk during a meeting of the House Education Committee.

Thank you for your consideration,

Josh Fry | Owner / Director / Editor / DP
