

Sound Policy. Quality Care.

January 23, 2017

Members, House Health and Human Services Committee  
Kansas House of Representatives  
Kansas State Capitol  
300 SW 10th Street  
Topeka, Kansas 66612

**RE: Support for HB 2107 -- Inclusion of biological products in the pharmacy act of the state of Kansas**

Dear Representative:

The Alliance of Specialty Medicine (Alliance) is a coalition of national medical specialty societies representing more than 100,000 physicians and surgeons. We are dedicated to the development of sound health care policy that fosters patient access to the highest quality specialty care. The undersigned member organizations of the Alliance of Specialty Medicine write in support of House Bill 2107 regarding the dispensing of interchangeable biosimilar products.

The Alliance has closely followed the development of federal and state policy related to biosimilars and the safety considerations that should be taken into account as more biosimilar versions of existing biologic medicines become a new treatment option for our patients. **Importantly, HB 2107 addresses key policy issues to ensure patient safety is preserved, including physician authority to prevent substitutions and ensuring that the treating physician is notified if another version of the biologic medicine is substituted for the version prescribed by the doctor.**

Specifically, we appreciate that HB 2107 does not allow for biosimilar substitution if the prescriber indicates that the script shall be dispensed as written. (p. 17, lines 25-33)

Also, we support that the bill requires notifying the prescribing practitioner of substitution "*Within five business days following the dispensing of a biological product....*" (p. 19, lines 8-17)

The practice of automatic substitution that is seen with generic drugs is not entirely appropriate for biosimilar products given that they are not simply "generic" versions of biologics. Physicians need to know what medicine their patient receives and therefore, the prescribing physician should be notified whenever a patient's biologic medicine is substituted. This will help to ensure the accuracy of patient medical records and identify any issues should there be an adverse event.

HB 2107 -- Inclusion of biological products in the pharmacy act of the state of Kansas

Page 2

Advances in medical treatment have transformed the way we fight certain diseases. Biologics, and biosimilars, will continue to be an important treatment option for patients. The Alliance of Specialty Medicine appreciates that HB 2107 ensures appropriate safeguards and urges that you advance the bill.

Sincerely,
