Subject: Response to Committee Questions
Date: Friday, November 9, 2018 12:50:34 PM

Here is the last question we had left to answer and the response:

Under Dep Secretary Cooper section

Any correlation between community corrections decrease and return admission increase?

The decrease in community corrections cases is directly related to the number of DUI cases that have been referred to Court Services instead of Community Corrections. There are some other factors that may have very small impact, but the main factor is the DUI case assignments.

Return Admissions and Community Corrections case load size are not related.
