

February 1, 2017

Good afternoon Chair Baumgartner, Members of the Committee.

My name is Kim Krull, I am President of Butler Community College, and am here today speaking on behalf of the Kansas Association of Community College Trustees (KACCT). I am the President of the KACCT Council of Presidents.

I am here to present information about tuition for students, both secondary concurrent (high school students taking college credit courses) as well as for postsecondary students. In addition, I have information about developmental education, courses taught to bring students up to a college ready level so they, too, can pursue higher education and technical skills to join the workforce in better paying jobs either as a career or to earn better wages to assist them in being able to afford a bachelors degree or graduate or professional degree.

First, I would like to talk with you about Kansas Community Colleges as context to that discussion.

As a system of 19 community colleges, we educate nearly 117,000 students. That's more than the state universities. And, we do it with quality and very efficiently. The average tuition and fees for an in-district student (which means from the college's taxing district) is \$2,789 for one full time year tuition and fees. You will see each college's tuition and fees listed on Attachment 2. In addition, during the 2015-2016 academic year, approximately 53,000 students utilized over \$168,500,000 of federal financial aid to attend Kansas community colleges. Between granting 15,520 skilled technical certificates and associate degrees, being a community hub and large employer in our communities and the flow of federal money to our students, our colleges fuel the economy. We do the majority of technical training, and with students transferring to 4-year institution and completing bachelor's degrees, Kansas is ranked first in the nation for students who start at a community college and complete their degree at a 4-year institution.

Attachment 1, illustrates other important information about our colleges.

Our colleges are governed by locally elected trustees who are accountable to their local taxpayers. They set tuition and approve our budgets. This is true at each of our colleges.

It is important to note that the local community provides on average 29.9% of the funding for our colleges with the state providing 17.8%. Every dollar of that 17.8% is appreciated and very necessary. We have seen no new state funding since FY 2008 for our transfer or general

education courses. While enrollment may increase, even with more high school students taking concurrent classes, there has been no corresponding increase in funding.

SB 155, which pays tuition for high school students technical courses through our colleges has been incredibly helpful and wildly successful. However, if that funding is capped, or reduced, in any way are created for the colleges as statute forbids us from charging tuition for those courses.

Kansas community colleges transform lives every day though the work we do and we appreciate the opportunity to speak with you about our colleges and the great work they do.

Attachment 3 is information about developmental (remedial) courses in Kansas. Attachment 4 contains responses to the questions presented regarding concurrent tuition and fees, both face to face and online, and whether state aid is provided for concurrent courses. I would be glad to stand for questions.

Respectfully submitted,

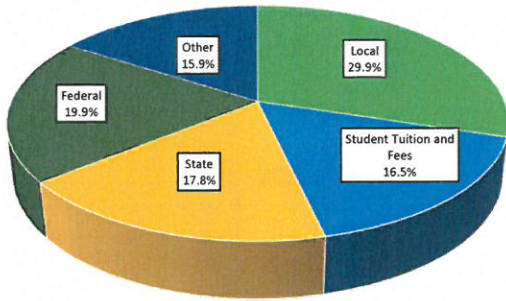

Dr. Kimberly Krull, President, Council of Presidents, KACCT

General Notes:

1. For **tuition and fees only**, “Academic Year” refers to a sequence of Fall, Spring, and Summer, the given year being the year in which the spring and summer semesters occur (i.e. the 2016 Academic Year for tuition, covers Fall 2015 + Spring 2016 + Summer 2016).
