### Chautauqua Hills Farm

1. Our current berry revenue source is split between sells from farm side, and farmers' markets.
2. Having the opportunity to have our berries made into wine, will enable us to have a market for berries that aren't quite up to standards.
3. Enabling us to sell the wine farm side AND at the Farmers' Market would help sustain our family business for longer than the short 6-8 weeks of berry sales.
4. Enabling us to add wine as another product for berry use, would enable us to produce a late (substandard) berry crop to expand our harvest season.
5. Having wine sales would provide for additional jobs in our community.
