Re: HB 2601

Dear Education Committee Members,

I am not eloquent. I am not anti-vaccines and I am not anti-health care. I am for the ability to choose what is best for me and my children. At this point all of my children are fully vaccinated however I want the opportunity to choose what is best for them specifically. Please don't take away the ability for a parent to make choices for their own families.

We are still the land of the free

Sincerely

Michelle Morris
