Re: HB-2601

Dear Chairman Huebert:

As a mother of three young children, I will be honest with you, I have kept up to date with vaccines on my first two children up to this point and I am questioning and researching each vaccine choice I make for my third child. I am not fully convinced one way or another that vaccinating is in the best interest of our children. However, I do know that I fully believe that whether or not to vaccinate our children should be our choice as parents.

I do not believe that the government should regulate what we have to put into our bodies or our children's bodies. It scares me to think that it has come to the point where a small group of people are making the decision for the masses without researching the effects of the vaccines on our children.

I want you to know that I support HB 2601 because it prevents the small group of people from mandating new vaccines on our children without parents having a choice.

Thank you for your time and consideration.

Sincerely,

Christy Sturdy

Colby, Kansas
